

Oxford Cantilever Polycarbonate Clad

Ideal for narrower play areas or covered walkway shelters, the Oxford twin hoop, trellis arch design is one of the most popular in our range of canopies. The cantilever format of columns and arches gives the advantage of removing one run of columns whilst also enhancing the visual appeal of the structure. The roof of the canopies can be clad with polycarbonate.

Warranties

Framework - 25 years
Polycarbonate Cladding - 10 years against discolouration through sunlight

Sizes

The maximum width for the Oxford Cantilever is around 3.5m but each canopy is fabricated to suit the clients requirements.
