Urban

Urban is an exciting new collection from Strata Tiles. A portfolio of five contemporary colours in a natural matt and polished finish, Urban is a strong addition to our popular Technical Basalt range.

Urban is a high performance porcelain stoneware tile developed with the needs of the designer in mind. The appealing assortment of sizes and technical characteristics that meet the demands of a commercial environment will surely make Urban the preferred product for many architects and interior designers.

Available in two sizes

60 x 60cm
60 x 30cm

Thickness

60 x 60cm
10.5mm* / Natural
9.5mm / Polished

Urban is also available in

Urban Part of the **Technical Basalt** Range

Technical Basalt is an amalgamation of several popular collections from Strata Tiles. A portfolio of porcelain stoneware that although favoured for the high traffic environment like retail spaces, hotels and commercial offices, the range also appeals to the contemporary interior designer seeking a signature surface for residential projects.

For details and samples of this complete range, please call our Offices on 0800 012 1454 or emailing info@stratatiles.co.uk

Urban | Technical Characteristics

Feature	Standard	Requirement by EN 14411 Standard	
Dimensional and Surface Quality			
Length & width	ISO 10545-2	± 0.6%	± 0.2%
Thickness	ISO 10545-2	± 5%	± 0.2%
Rectangularity	ISO 10545-2	± 0.5%	± 0.2%
Straightness of edges	ISO 10545-2	± 0.6%	± 0.2%
Surface flatness	ISO 10545-2	± 0.5%	± 0.2%
Physical Properties			
Water absorption.	ISO 10545-3	≤ 0.5%	Average Value: 0.1%
Flexural strength	ISO 10545-4	≥ 27N/mm ²	Average Value: 40N/mm ²
Frost resistance	ISO 10545-12	Required	Average Value: Resists
Resistance to abrasion	ISO 10545-6	Max ≤205mm ³	Average Value: 115mm ²
Linear thermal expansion	ISO 10545-8	≤ 9 MK4	Average Value: 6.2 MK4
Hardness (Mohs Scale)	UNI EN 101	≥ 6	8
Slip Resistance			
	DIN 51130	R9 = 6° + 10°	Natural
		R10 = 10° + 19°	Polished

Pendulum Test

Finish	Surface Roughness	Result	
		Dry	Wet
Natural	11.7	57	35
Polished	3.4	60	15

Potential for Slip

High
Moderate
Low

Pendulum Test Value

0 - 24
25 - 35
36+

The TRL pendulum tester has a range of readings from 0 to 150, high values indicating good slip resistance. Guidance on the interpretation of results using the Four S Slider is suggested by the UK Slip Resistance Group² as listed above.

More ranges from Strata Tiles

Strata Tiles have a number of other collections that you may be interested in, below are some brief details of these. Please contact us if you would like any samples of these stunning ranges.

Technical Basalt

A mature range of porcelain tiles for the contemporary high traffic project

Technical Concrete

A selection of great ranges giving that richness and benefits of an engineered concrete

Technical Limestone

A beautifully presented range and modern in design. Loved by Architect and Interior Designer alike.

Technical Stone

An incredible portfolio of technical stone extensively used throughout heavy traffic environments due to its strength and durability

Natural Stone

A rich selection of natural stone make up a portfolio of truly emotive colours and finishes.

Mosaics

One of the largest portfolios of mosaics and a regular resource for many design practices. From marble and porcelain to glass and ceramic mosaics, we really can almost provide any colour match needed.

Strata Tiles Case Studies

Strata Tiles are proud to have supplied material for some of the most striking projects, from sports centres to airports, underground stations to luxury hotels. The materials we provide are also as varied, from beautiful natural stone to porcelain tiles, solid marble to glass mosaics.

Below are just a few of the great projects we have been proud to work on.
