Forbo's ablaze!

Forbo Flooring Systems has supplied its new and sophisticated Tessera Alignment carpet tile to Safeland PLC, London, to complement its new contemporary offices.

London-based Coraff Carpets specified Forbo's Alignment collection to suit the clients objective of a unique and different flooring scheme. The new offices for the property trading and investment company are largely open plan, so the design had to suit the sizeable area, whilst complementing the modern and sophisticated surroundings.

The Alignment tile was specified in two colours; Blaze from the new Alignment Highlight range alongside Alignment Nucleus and was laid in four tile blocks in a tessellated fashion to specifically create a striking and bold design statement. There are four accent colours in the Highlights collection that can be used as Blaze, a vibrant red, has been in combination with Nucleus to designate areas or direct traffic through a sophisticated flooring design installation.

The Alignment collection responds specifically to emerging trends in the office sector for bold linear patterns and sharp accent colours, and was therefore ideally suited to

the contemporary commercial interior. Alignment is a cut and loop carpet tile manufactured from solution dyed yarn ensuring long lasting colour fastness and durability. It is also supported by a 10 year guarantee as standard, for piece of mind under heavy contract conditions.

"The project required a very short time frame to be completed – three days. Forbo's service and delivery were exceptional and we were able to fit and install the carpet tiles quickly and smoothly, with no complications," explains Paul Abbott, Director at Coraff Carpets. "The client was extremely pleased with the outcome, the design worked fantastically and we were on time and on budget."

Ray Lipman, Chairman at Safeland PLC comments: "We were looking for a flooring scheme that was a bit different, helping our new offices to really stand out. The stylish red accent colour, set against the dark grey texture and combined with the linear concept, certainly creates a feature statement that complements the new modern offices and open plan interior. We are very impressed!"
