building washrooms

options
the economy cubicle and service concealment system

Options

Grant Westfield Ltd has over 125 years experience in manufacturing washroom systems. This expertise has been combined with a contemporary standard colour range (please refer to our separate colour chart) to offer the best value for money cubicle and ducting systems available in today's market. Options cubicles are supplied with the iconic and stylish Grant Westfield stainless steel legs and indicator bolts, offering a look and feel of sophistication.

Options Service Concealment offers you the possibility of using the skillfully engineered clipclad® framework, ultimately saving costs on installation. Options is the ideal solution for budget driven projects for almost every market, including **education, healthcare** and **hotel & leisure**.

All Options cubicles can be supplied in compliance with Document M 2004 legislation as well as the 2007 DDA regulations in Scotland. Contrasting pilaster colours are also available on all Options cubicles in accordance with DDA visual impairment regulations.

Options is a practical, cost effective collection of washroom elements for cubicles, service concealment and vanity areas.

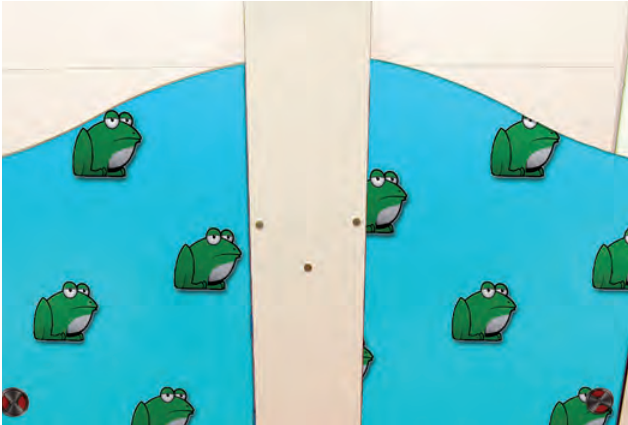

Contents

Essence Cubicles p04- 05
Available in melamine faced chipboard or laminate with a square or curved edge

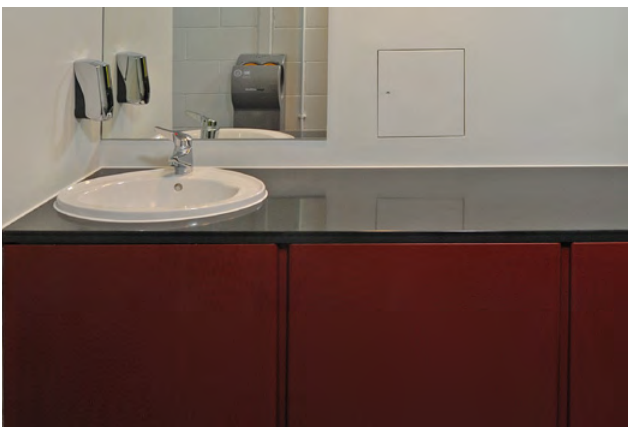

Scuba – Water Resistant Cubicles p06
12-13mm solid grade laminate for use in wet areas and for tough impact resistance

12-13mm solid grade laminate, with vibrant designs

Service Concealment Systems p08-09
Plywood or metal frames with loose panel sets for protection of, and access to service pipe work.

Options Accessories p10
Vanities, mirrors, wall lining, waterless urinals and more...

Performance p11
Materials, hardware and cubicle comparison

Options Essence

Essence cubicles represent excellent value for money, combining a wide range of decors with the quality and aesthetics that are synonymous with Grant Westfield washroom systems. Each set of cubicles are made-to-measure, ensuring the end appearance is beyond the competitive price. Essence cubicles are available in three variations, for which technical information can be found on P.I.I.

For a cost-effective solution to line non-serviced washroom walls, our multiPANEL waterproof wall panels can be manufactured in any cubicle colour from our separate colour chart.

Available in two materials:

- 18mm Melamine Faced Chipboard (MFC) for low traffic, dry environments, eg factories or small office
- Laminate bonded onto 18mm furniture grade chipboard, often used in retail, commercial and public sector

Laminate cubicles are available with a choice of two edge details:

- Square Edge Laminate (SEL) - pilaster and door edges are lipped with 2mm ABS edging tape.
- Curved Edge Laminate (CEL) - vertical edges of pilasters and outward opening doors are post-formed to a 12mm radius, providing an elegant finish.

Signature Lock

CEL; Rouge Cerise / Gris Perle

SEL; Maryland Clair/ Maryland Foncè

Options Scuba

Scuba cubicles are produced in 12/13mm compact grade, black core laminate to provide maximum protection against water, wear and vandalism. The solid core properties of this material prevent peeling and cracking, and make it easy to clean. For health and safety, corners on doors and pilasters are radiused, and all edges are machined to a smooth profile.

In schools (or any area where privacy is paramount), a floor to ceiling variation is available to meet SSLD-3 guidelines. For pool-side and other wet areas, Scuba hardware can be supplied in 316 grade stainless to prevent erosion.

- Manufactured in tough 12/13mm compact grade laminate
- Waterproof and impact resistant
- Ideal for leisure, education and detention centres
- Floor to ceiling variation available
- Optional curtains, shower seats, mirrors and clothes hangers

Maryland Foncé / Gris Perle – Floor to Ceiling variation.

Pommier De Honfleur / Gris Perle

Options Scamp

Scamp cubicles are a variation on the Scuba cubicle range, combining tough, impact resistant solid grade 12/13mm laminate doors, partitions and pilasters, with vibrant colours and low level doors for supervisor access, where required.

Feature doors can be custom-profiled to add aesthetically interesting shapes to the system, and intermediate partitions can be full height, door height, or shaped to your requirements.

- Low-level doors for easy supervisor access
- Available with embedded graphic designs
- Ideal for nurseries and primary schools
- Manufactured in tough 12/13mm compact grade laminate
- Waterproof and impact resistant

The Frog design from Grant Westfield's standard collection. Custom designs are available for larger contracts.

Options Service Concealment

The Options Service Concealment System is designed to provide cost effective access ducts and panelling to washrooms and other places where there is a requirement for decorative concealment of services with maintenance access. The selection of panel specifications and finishes offer a wide flexibility of choice - to meet budgets at all levels.

There are two service concealment systems made from either plywood or engineered metal frames. Both systems can be supplied pre-machined to accept your chosen sanitary ware, if required. The modules link together for a robust, fast and easy installation.

Groups of assemblies can accommodate cubicles from the full Grant Westfield cubicle range, as well as most proprietary and custom designed cubicles. Alternatively, panels and mounting clips can be supplied for mounting to your own prepared site framework.

Neon (non-standard)

Ebony Oak (non-standard)

Blanc Antique with Black Edging

Options SC Ply

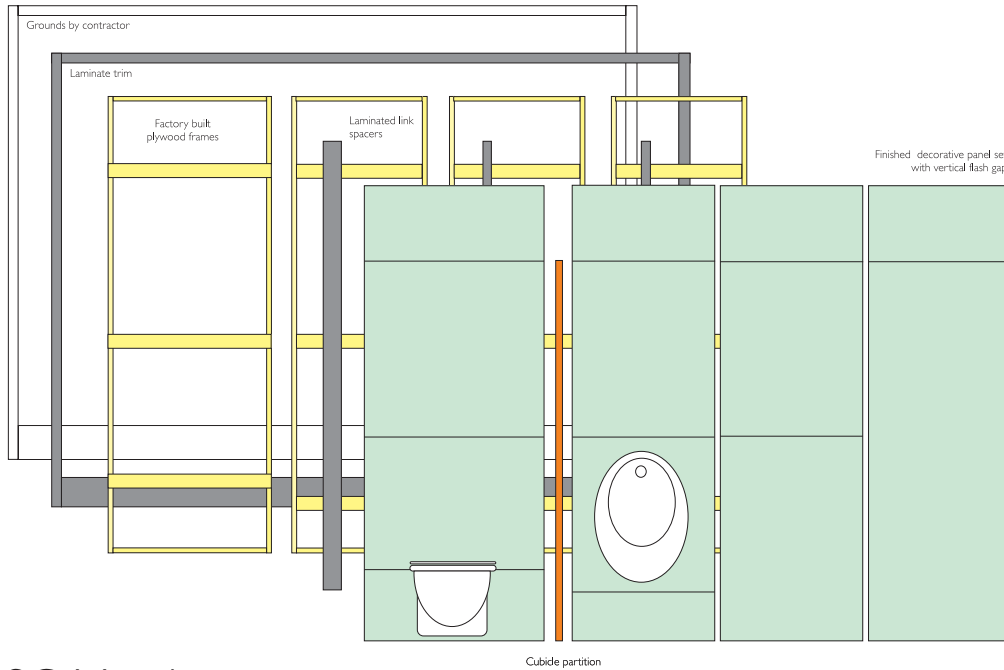

This range offers factory assembled plywood frame and panel sets for service concealment ready for installation to prepared surround grounds.

These elements can be supplied in a range of sizes dependent on the sanitary ware application or space available. Link spacers are provided to fit between the elements to set the modular layout. These can be faced with laminate where flashgaps are to be created.

Optional laminate faced trims can be supplied for finishing the contractor installed surround grounds. End panels are available to convert the elements into single or multiple assemblies for hospital or health care applications.

The elements comprise:-

- Duct Panel/Frame assembly with WBP plywood frame
- Finished decorative panels factory mounted to the frame with proprietary clips

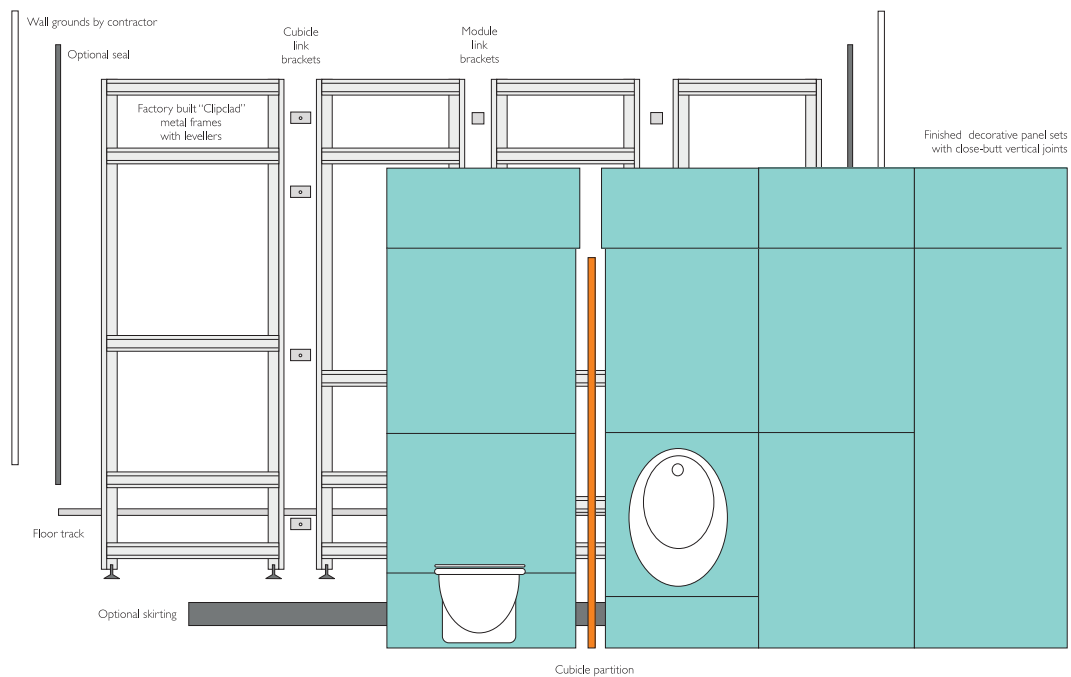

Options SC Metal

Offering a similar modular supporting framework to Options SC Ply, this system is manufactured from engineered metal frames incorporating clipclad® technology and sits in a steel floor track for precise alignment.

The system is complete with the mounting frames to accommodate both wall hung and floor mounted sanitary ware, tested to meet the relevant standards.

The elements comprise:-

- Duct Panel/Frame assembly with metal frame and floor track
- Finished decorative panels factory mounted to the frame with proprietary clips

Options Accessories

Vanity Areas and Mirrors

We offer standard and custom built vanities and sill tops in a range of materials from simple post-formed laminated tops to solid surface tops with fully integrated bowls to granite, stone and glass applications to suit the levels of specification required by your project. Mirrors can be supplied along with Options Service Concealment Systems.

Wall Linings

Grant Westfield manufactures multiPANEL WBP plywood wall panels bonded with a choice of 30 decorative high pressure laminates. Combining the two systems, using multiPANEL laminate and even matching vanity tops produces stunning results. In addition, tilePANEL waterproof panels are only 3mm thick, and are manufactured with an embossed tile effect.

Sani-Saver

Sani-Saver is an easy to fit replacement urinal kit that eradicates energy usage from flush controls or constant flushing, saving between 50-90% on water usage. Each kit comprises a urinal, a high performance wall mounting panel, a waterless cartridge and all fixings. As well as combating odour from above and below the bowl, Sani-Saver gains BREEM points and slashes water bills.

Complementary Products

Where Options is used in leisure and education environments, Grant Westfield offer a wide range of locker and benching solutions, in a variety of materials to suit the environment and budget.

Flooring can also be provided with twinFLOOR®. The floating vinyl floor is completely waterproof, requires no adhesive or specialist fitters, and is available in authentic wood and stone designs.

To complete the offering, our Class 1 fire rated PVC ceilingPANEL offers an economic, simple and attractive ceiling cladding solution.

Performance

Compliance

Options cubicles can be supplied with a removable pilaster to comply with current regulations for emergency access. Visit www.grantwestfield.co.uk to view a demonstration video.

Colours

To ensure Options continues to provide the best value for money in the marketplace, we have created a colour range which is available at the best prices, and on the shortest lead times. Please refer to our separate Options & Lockers colour chart.

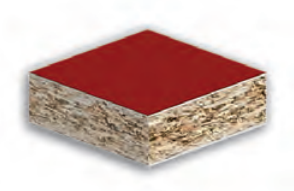

Signature Hardware

All Options cubicles come with Grant Westfield signature 304 grade stainless steel indicator bolts and support legs, offering the best in aesthetics and economy.

Board Grades

Melamine Faced Chipboard (MFC)

Melamine Faced Chipboard (MFC) is constructed from a resin impregnated decorative paper mounted onto a high quality chipboard core.

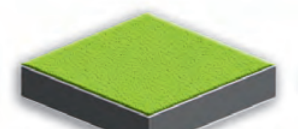

High Pressure Laminate

High pressure laminate (HPL) is constructed from several layers of resin impregnated paper, pressed at high heat and pressure. Post-forming grade laminate is used for feature curved edges on doors, pilasters, vanity and sill tops.

Compact Grade Laminate

Compact grade laminate is specifically designed for more robust environments. Manufactured with a solid core, constructed from multiple layers of quality Kraft papers impregnated with resins and with two decorative surfaces for cubicle construction, it is extremely strong, durable and has remarkable structural stability.

Options Cubicle Comparison
