

The Pergola [ITEM 74]

A beautiful natural limestone and oak garden pergola; the classical columns hand carved from solid natural limestone are surmounted by a traditional Trellisage constructed from green oak. In past centuries, the pergola was constructed to support vines, in recent years it has become a feature that has added greatly to the beauty and interest of our gardens. Rose, Wisteria, Jasmine, Clematis, Honeysuckle and Laburnum are only some of the many climbers planted to embellish the pergola.
