Off-white glue for interior woodwork. Provides strong glue joints but has limited water resistance. Due to the slaked lime content, this glue is highly alkaline & may discolour the wood. 1kg covers 7 – 10m<sup>2</sup>.

#### 806 Care Oil - £12.79/1litre

For the maintenance of oil finished interior wood. Suitable for furniture, window frames etc. Suitable for use on floors, a buffing machine is advised to achieve the best possible finish however. Creates a water resistant surface and improves stain-resistance by renewing the oil layer. 1 litre covers 83m<sup>2</sup>.

#### 807 Care Wax - £12.79/1 litre

For the maintenance of wax finished interior wood. Suitable for furniture, window frames etc. Suitable for use on floors, a buffing machine is advised to achieve the best possible finish however. Creates a water resistant surface and improves stain-resistance by renewing the wax layer. 1 litre covers 83m<sup>2</sup>.

#### 808 Worktop Oil\* – £13.71/375ml

For the protection and care of kitchen worktops, cupboards and general wooden furniture. Regular use of this product will keep your worktops well maintained and looking beautiful. Apply with a cloth. 375ml covers 6 – 8m<sup>2</sup>.

#### 813 Mould Remover\* – £11.99/500ml

An easy to use borax based solution in a handy spray-gun with nozzle for the removal of mould – particularly in damp and high condensation areas like bathrooms. To be used prior to painting and decorating. 375ml covers 6 – 8m<sup>2</sup>.

**Products marked with an asterix \* are vegan, containing no animal-derived ingredients.**

- All prices are inclusive of VAT.
- Please ask about trade and bulk discounts.
- 30ml tester pots are available across the entire range for £2.00. Larger sizes are available – please ring for availability and cost.

- Please note: Coverage in m<sup>2</sup> is an approximation only. Actual coverage is dependant on the absorbency of the substrate and may vary from the stated value.

AURO are distinguished among manufacturers of natural paints because we have always been the most committed and uncompromising in respect to the environment.

This extends to not using petrochemicals in our formulations, even when there is a cost advantage, and to always ensuring that the natural raw materials used come from environmentally respectable sources.

Our products need only a small fraction of the energy required to make synthetic alternatives. The raw materials come from a sustainable ecological cycle, self-renewing and readily available. Any waste product can simply be dried out and added to the compost heap. We are also happy to fully declare all of our ingredients – these are available on a separate sheet.

Perhaps it is not surprising, then, that in 2003 AURO was voted 'Favourite Ethical (DIY) Product' by readers of 'Ethical Consumer' Magazine. Several AURO products have also been highly recommended by the German environmental 'OKO TEST' Magazine and many have the stringent Natureplus certification label.
