

Josta 2-tier rack—2008 version

Josta has improved a great bike rack even further!

The new 2008 model of their proven and popular 2-tier rack is now even easier to use.

A sophisticated gas-spring mechanism on the top rack makes it even easier to load and unload the bike, as the cyclist does not have to bear the weight of the bike.

This new system has already been specified for various major new projects across Europe.

This 2-tier racking system stores one bike directly above the other. It therefore increases the amount of bicycles parked (or reduces the size of the site) by up to 50%.

The rack is custom-made for specific sites to maximize the cycle parking capacity, so please contact us for a quotation or for help with your site planning.

Launch of the new Josta 2-tier rack at the 2007 Velocity Conference in Munich

NEW IMPROVED DESIGN ** NOW EVEN EASIER TO USE**
