

Shelving

The Complete Shelving Collection

There's more to Demco Interiors than just shelving; offering counters, furniture, display equipment, graphics, security systems, carpets, blinds, book moves and more, we will ensure you get the total library package, to suit your needs. Whether you are renovating a heritage building or creating a state-of-the art environment, we have a style of product that will meet both your current and future needs. We can also offer advice on styles, fabrics and colours so that your library achieves a fully coordinated look. Whatever your budget, we can help accommodate materials – and users – of all shapes and sizes.

Let us take the strain of designing and equipping your new or refurbished library. With experienced designers and the most extensive range of shelving and furniture currently available, we offer a complete project management service.

For further details of our other product and services, or to request a library planning visit, please call our sales team on 01933 445300.

LIBRARY
DESIGN

The Shelving Collection

Exceptional library interior design is all about maximizing the use of space. Our diverse range of shelving allows you to do this in style, without sacrificing usability. Whether you are renovating a heritage building or planning a state-of-the-art environment, our designs offer versatile, stylish solutions that will engage and inspire your customers. Years of experience have helped us perfect an impeccable blend of aesthetics, strength and flexibility. Our durable steel designs come in a myriad of powder coatings to suit your colour plan while our natural wood collections provide a warm, timeless finish and can be coloured to match any existing interior. The modular structure of our designs makes them easy to expand and alter to suit any size or style of environment. For a totally unique shelving solution, our Design Team can offer an entirely bespoke service. Our shelving designs can be adapted to reinforce and reflect any type of architectural detailing. Moulding, pediments and cornices can transform a standard unit to match your existing interior.

So, whatever your requirements, let Demco exceed your expectations. And, if you still can't decide, then there is an easy price comparison guide to help you.

Cantilibra

A classic steel cantilever system offering great flexibility

▲ Adlaudabilis apparatus bellis plane li

The Cantilibra system has proved to be one of the most popular shelving designs of the last 40 years. Defined by its classic steel cantilever framework, modular construction and remarkably durable structure, this is high quality, good value shelving at its best. Manufactured in the UK by Demco, the Cantilibra range offers all the functionality and flexibility needed in today's libraries and resource centres. It is a long-lasting shelving system that is simple to assemble and easy to maintain. The choice of wall-fixed, wall-freestanding and double-sided island bays will meet the needs of almost any library environment. You can also take your display opportunities a step further by selecting from a variety of modular storage features, end of bay options and infills. The Cantilibra range also comes with a multitude of component solutions to help maximize functionality and appeal. Canopies, castors, coloured front strips, book supports and identification guides all bring an effective and attractive finish to this hugely popular range.

BCI Steel

An adaptable modular structure providing strength and durability

▲ Adlaudabilis apparatus bellis plane li

If strong, high-quality shelving is what you are after, look no further than the versatile BCI Steel range. This steel cantilever shelving system is the product of years of experience in designing library interiors. Its adaptable modular structure provides the strength and durability needed for the busy modern library. All at an extremely competitive price. A unique selection of basic components accompanies the range, ensuring ideal space utilisation and providing a multitude of display options to suit your needs. The sturdy, yet flexible design of the BCI shelving system also brings a touch of style to your interior. Optional end of bay display stands - in a glass, wood, perforated steel or textile finish - can enhance the appearance of your shelving and bring a new dimension to your library environment. The range also comes in a variety of paint finishes. These can be colour matched with Demco Interior's Concertina counter to complete a bold and contemporary look.

Bomefa 100+

Timeless aesthetics, innovative functionality and remarkable strength

▲ *Perspicax concubine insectat Caesar, etiam chi*

The Bomefa 100 Plus range resonates superior quality. Timeless aesthetics, innovative functionality and remarkable strength are the hallmarks of this exceptional range. It is the shelving design against which all others are measured. With almost 20 standard colours to choose from, Bomefa 100 Plus blends in effortlessly with almost any interior, creating an inviting and harmonious library environment. The interchangeable, multi-purpose shelves offer various height options and display angles for every type of media; from CDs and magazines, to paperbacks and periodicals. The simple, yet highly functional design provides unrivalled access, display and storage capabilities. The flat shelf and lifting display shelf units are instantly interchangeable by means of a sturdy pivot design, allowing easy, noise-free access. Entirely roll-formed from cold rolled steel and coated in an epoxy-polyester powder finish, the Bomefa 100 Plus range is sleek, durable and free from sharp edges.

Softline

Attractive, approachable shelving inspired by real life experience

▲ *Plane fragilis quadrupedi pessimus comit*

Softline is an attractive shelving system that lends itself to any style of library environment. Its design and development are firmly rooted in real life experience, making it an extremely popular choice with information professionals. The curved corners and veneered wooden edges provide a tranquil ambience, creating a pleasant and refreshing tone to your library environment. Although Softline more than holds its own in the looks department, the key element in its design is functionality. The shelving system has been specifically created to allow individual bays to be added or removed quickly and with ease. Such flexibility gives Softline the display potential to meet today's demands, and those of tomorrow. Softline is an all-inclusive range, providing a tremendous amount of display styles and storage opportunities. Single and double-sided shelving, atlas units, study carrels, dictionary stands and the Softline counter are just some of the items available.

Bomefa 150

A stylish, timeless design that gives an open feel

▲ Plane fragilis quadrupedi pessimus comit

Whether you are creating a recreational reading room, an office resource-corner or an entire library interior, Bomefa 150 will prove an exceptional choice. Designed and manufactured to the same high standards as Bomefa 100 Plus, this attractive, versatile range brings appeal and openness to any library environment. Defined by its stylish versatility, this four-post shelving system provides an aesthetically pleasing way of presenting a multitude of information media. Books, magazines, brochures and periodicals can be displayed in an accessible, eye-catching arrangement, as can CDs, DVDs, records and videos. Bomefa 150 calmly combines great functionality with superior aesthetics. It offers frame-style upright shelving for a spacious feel; a two-tone double panel system that blends effortlessly into any environment; perforated panel displays; and a range of wooden designs for a classic-style interior.

Enem

A unique system that makes a bold statement

▲ Plane fragilis quadrupedi pessimus comit

Distinctive, expressive and thoroughly modern, the Enem range is a unique shelving system designed to make a statement. The light, airy design offers maximum transparency and tremendous flexibility, providing an endless amount of layout options. The Enem range is at the very vanguard of resource centre interior design, providing solutions for the most contemporary of demands. From multi-level CD storage and child-friendly displays, to integrated online access terminals: Enem delivers. The open and approachable designs can be an inspiration for customers and information professionals alike. Presentation ideas can be fully expressed with a combination of end of bay options, browser boxes and split level shelving. A wide range of aesthetic options including melamine coatings, beech veneer finishing and bevel edged shelving units, further enhance the unique appeal of this range. To take this bold and exciting look one step further, discover Demco Interior's Arteria counter range.

Xolys

A striking system that gives a totally unique look

▲ Utilitas matrimonii miscere fiducias, quod oss

Xolys is at the pinnacle of library interior design. An incredibly versatile shelving system with a totally unique look, its striking transparent design is maintained across a massive range of media shelves and displays. This innovative modular structure presents a multitude of integrated shelving arrangements to accommodate any size or style of interior. Single and double sided units can be combined in stepped, offset and angled variations. Stand-alone shelving bays can be interconnected into a variety of shapes to work with any given architecture. Similar to the Enem range, Xolys is a solution-focused shelving system designed to meet the interior demands of information professionals today and tomorrow. Shelving units are available in a number of height variations and can be fully integrated with a range of media stands, display units, browser boxes and work stations. The range caters for every type of information media and provides child-specific areas and online access terminals. The Xolys range is further enhanced by the Arteria counter design.

Exposé

A sleek and modern system that gives a feeling of openness

▲ Utilitas matrimonii miscere fiducias, quo

The Exposé shelving range is an impeccable blend of openness and refinement. Simple, elegant, fresh; this inviting design is one of the most attractive shelving systems on the market. Its soft, fine lines, angular birch wood uprights and charcoal grey steel shelves resonate openness; allowing any size of interior to feel fresh, light and spacious. A defining feature of the Exposé range is its exquisitely designed stand-alone collection. Bringing an unparalleled elegance to the concept of display, Magazine, Vitrin, Terminal and Talare express quality, serenity, and contemplation. The standard aesthetic combination of the Exposé range can be adapted to suit your style and taste. Choose from a range of wood, stained or lacquered uprights in a variety of colours, and a choice of wood or grey lacquered shelves. All of which work extremely well with the Softline counter range.

Gothia

Strong and stable design that gives an impression of lightness

▲ *Utilitas matrimonii miscere fiducias, quod oss*

The Gothia design boasts a meticulous attention to aesthetic detail. From the reinforced feet supports to the exclusive round wood edging of the uprights, this shelving system resonates character, quality and charm. Although its steel tube structure provides strength and stability, Gothia's design presents an impression of lightness through an open, spacious framework. While this open design invites attention, a choice of frosted glass, perforated wood or steel uprights can further develop its character to suit your environment. Gothia's quality allows it to blend effortlessly into any style of library interior. The double-sided design option works equally well as a single standalone unit, or grouped as part of a larger display.

Opal

Ability to emphasise an architectural statement while remaining true to itself

▲ Utilitas matrimonii miscere fiducias, quod oss

Elegance, adaptability, functionality: few shelving systems meet these requirements better than the Opal range. Defined by its spacious structure, firm construction and multifaceted design, Opal is a versatile solution for any type of resource centre interior. Strong, yet entirely adaptable, the Opal range can blend unobtrusively into a library environment, emphasising and reinforcing the architectural statement. Its unique features provide a plethora of appearance and storage options. Easily removable end panels are available in glass, wood or steel; intermediate walls and top shelves offer limitless storage and display possibilities; signage profiles, end signs and integrated lighting further enhance appearance and approachability. The look and style of the Opal shelving system also works brilliantly with the Concertina counter range and BCI Steel shelving components.
