Warranties and Maintenance

All products carry a 12 month minimum parts and installation warranty. Motorised products carry up to a 5 year parts warranty on various motors depending on specification and requirements. Service contracts and maintenance agreements are offered as part of the package to provide ongoing service. This is backed up by a repair and emergency call out operation, for peace of mind. Your future secured

Introduction

Harling security is a specialist manufacturer and supplier of a wide range of security systems for property protection for both new build and refurbishment works. From its comprehensive range, security shutters, fire shutters and other products comprising steel gates, specialised shutters, steel doors, cages, strong rooms, crime shields, screens, louvre panels, sliding grille and security fencing.

Harling security is a family firm that has years of experience with highly trained operatives and offers a wide range of services for small to large projects. The company is experienced in design, manufacture and installation of physical security products to meet all requirements and is a dedicated company working from the initial design concept through to final installation and after-sales service. The company pursues rigorous testing and maintains continually high standards so that applicable products will comply with current and future CE Regulations. Products have police preferred specification, have achieved LPCB 1 to 4 ratings and are insurance approved, as well as being Secured by Design to SEAP Class 2.

Dear Customer,

We would like to introduce Harling Security as a family firm that has been established over nearly 20 years, with an extensive knowledge and experience in the field of security, working with councils, schools, colleges, contractors and commercial groups.

Some of our products are;

- Roller shutters (fire and insurance rated, decorative and security)
- Grilles (fixed, sliding, general purpose, and insurance rated)
- Gates (automated and manually operated, steel and wooden)
- Steel doors (general purpose, bespoke, security, insurance and acoustic)
- Barriers (automated and manually operated)
- Fencing (steel security type, railings and guard rails)
- Bollards (telescopic, fixed, automated and anti – ram)
- Access control (to gates, doors, shutters and grilles)
- Intercom systems
- Security lighting
- Safes, strong rooms and steel cages
- CCTV
- Rotating spikes and anti climb products
- Bespoke and tailor made products, complete security packages and systems

As a company we provide a high level of service and strive to maintain a level of high quality products.

We offer service from advice through to design, manufacture, installation and providing warranties on all products. We also give the options of on going service and maintenance contracts for peace of mind and, meeting health and safety requirements where necessary. We also provide a call out and repair service in case of emergencies, with quick response time.

Our installers are all highly skilled with certified health and safety training, as well as the company having its own health, safety and environmental policies, with external advisors. Products meet latest CE regulations.

I trust we can be of use and look forward to the opportunity of working with yourselves.

Yours faithfully

Justin Cooper
Sales Manager

Harling Security is a specialist manufacturer and supplier of a wide range of security systems for property protection for both new build and refurbishment works. From its comprehensive range, security shutters, fire shutters and other products comprising steel gates, specialised shutters, steel doors, crime shields, screens, louvre panels, sliding grilles and security fencing are described here.

Introduction

Harling Security has years of experience with highly trained operatives and offers a widerange of services for small to large projects for new build and refurbishment works. The company is experienced in design, manufacture and installation of physical security products to meet all requirements and is a dedicated company working from the initial design concept through to final installation and after-sales service.

Automated Gates

Authority

The company pursues rigorous testing and maintains continually high standards so that applicable products will comply with current and future CE Regulations. Products have police preferred specification, have achieved LPCB 1 to 4 ratings and are insurance approved, as well as being Secured by Design to SEAP Class 2.

Steel Doorsets

Fire shutters

Description Fire shutters comprise steel fire security shutters, smoke screen fire shutters and smoke curtains. They are 1 - 4 hour fire resistant and are usually electronically operated with controlled descent which operates in the event of a fire either by a signal from the fire alarm or a fusible link. Audio and visual panels are available with a timed delay. The control systems can also raise the shutter in an alarm activation. Manual options are also available.

Aluminium shutters

Description Aluminium shutters comprise continental shutters, heavy-duty, punched and glazed, slats with vented options, portcullis, tube and link or mesh. Built-in shutters are also in aluminium allowing the shutter to roll up unseen. Insulated shutters are available.
Appearance Finishes are powder coated or anodised to any BS or RAL colour.

Steel roller shutters, industrial, car park and three phase

Applications Steel roller shutters are suitable for a wide variety of applications which include residential, leisure, educational, commercial and industrial uses.

Description Shutters are versatile and can be used with a variety of standard or alternative fixing options. Steel shutters offer maximum security with a choice of curtains including solid steel, steel perforated (with 20% light transmissibility) or punched. Steel laths are available in a variety of sizes and designs with curly laths offering the highest security protection. Shutters can be manually or electrically operated. All necessary access controls and electronics are available. Operation can be by key, rocker or push-button switches as well as by remote control, timers, free exit loops, intercom systems, battery back-up systems and break glasses.

Appearance The standard finishes are galvanised and powder coating to any BS or RAL colour.

Specialised horizontal and vertically rising shutters

Description Specialised shutters comprise stainless steel shutters, built-in systems, polycarbonate or see through shutters or polylink shutters. Bespoke designs and systems can be produced to suit most applications, including vertically rising shutters.

Steel doors

Description Steel doors comprise high security doors, general-purpose steel doorsets, fire rated doors (up to 6.5 hours), stainless steel doors,

sub-station doors, industrial, vault and prison doors, as well as antiballistic doors. They can be purpose-made to bespoke designs with choices of vision panels, over-panels, louvres and locking mechanisms including access control. Doors can be supplied with LPCB Level 1 - 4 ratings.

Crime shields, screens and louvre panels

Description This group of products comprises hinged, fixed, removable and sliding perforated screens. They are insurance approved.

Sliding fixed and decorative grilles

Description Grilles comprise sliding, fixed, hingeaway and bars to LPCB 1 and 2. Secured by Design grilles are available with a Seap Class 2 rating. Grilles can be designed and made with hinge-up track or no-bottom track to avoid being a trip hazard. Decorative grilles can be manufactured to meet requirements or to match existing for refurbishment works.

Gates, railings, barriers and security fencing

Description Gates are designed and manufactured to order, offering bespoke designs and a wide range of automation and controls, gates can be manufactured as sliding, swing or bi-folding gates with railings to match. A range of security fencing and automatic barriers are available. Gates are galvanised, stove enamelled or powder coated to any BS or RAL colour.

Perforated Steel Shutters

Aluminium Shutters

Automation

Automation and access control can be added to any of the company's products to enable them to work in conjunction with each other or to link into an existing system.

ECONOMICS

Guaranteed 5 year warranties are offered on all SOMFY motors used in the range of shutters and 12 month warranties with installations.

SERVICES

Assistance on sales enquiries and technical advice is available from the company with architectural literature available on request. The company offers involvement and designs at the early stages of projects. An installation service using the company's own employed installers and maintenance contracts are available on completion.
