Zip and Link

Because comfort is a matter of personal choice, there can be no 'right' or 'wrong' solutions. We have the best of both worlds. The Regency Zip and Link facility enables different spring tensions to suit the preferences of each sleeping partner and offers the added ability to split a double bed into two singles when needed.

ReActive Pillows

The Hypnos ReActive Pillow consists of over 40 individual pocket springs.

It actively supports your head in the optimum position to help keep your spine straighter during sleep, regardless of how much you move in the night.

Unlike conventional pillows that need to be 'fluffed' up to regain their original feeling and comfort, the pocket spring construction allows Hypnos ReActive Pillows to instantly spring back into shape.

Choose your Storage Options

Our divan bases can include drawers in various configurations to accommodate your personal needs and your room.

The right detail

“Remember, disturbance by your partner is one of the most common causes cited for a lack of sleep. Real luxury and great sleep normally start off with a big bed. If you sleep on your own choose our 4ft Independence size for a truly comfortable experience.”

Our extensive experience in pocket spring technology has produced many combinations of spring geometry. Defining new levels of individual comfort, your choice of spring tension ensures your personal level of support.

The Regency Collection offers a breadth of comfort and support levels to suit your personal preference. Our guidelines are:

Up to 15 stone (95kg)	Regular spring tension
Above 15 stone	Firmer spring tension
