

# Oak Leaf Gates

# Make an entrance with Oak Leaf Gates

At Oak Leaf Gates we specialise in creating the ultimate entrance for any home - beautiful gates in solid oak, made individually for your home and built to last for generations.

Our story began in 1992 when the Oak Leaf Gates team of craftsmen began designing, producing and installing solid oak gates.

We have been committed from the start to the highest standards in craftsmanship and design and we only work in solid, well seasoned English and European oak from sustainable sources.

This brochure shows our range of designs, each of which can be customised for you, and it is important to remember that Oak Leaf Gates can also create unique designs specific to your home. All our gates are suitable for automated opening systems.

# The Kinnersley

The tongue and groove boarding of the Kinnersley gate gives a pleasing simplicity to the design. This gate is fully boarded to create complete privacy and an even greater sense of security.

Our specially designed, stainless steel hinge system means all our gates can be mounted very close to their piers for guaranteed privacy.

MICHAELMAS

# The Monnington

The Monnington has been designed with raised panels for an impressive frontage. This gate is panelled both sides giving the same impressive view from outside and within the property.

As with all our entrance gates, the Monnington can have a falling curve top, a rising curve top or a straight top.

# The Belmont

The partial boarding of the Belmont gives a lovely welcoming effect where privacy is not so much of an issue. The traditional feel of this design, with its hint of the countryside, has made it very popular.

Belmont – detail (weathered)

# The Berrington and The Stretton

Two more partially boarded gates, the Berrington and the Stretton, use spindles in the upper sections instead of the flat palings used in the Belmont design.

The square spindles of the Berrington and the round spindles of the Stretton give a lighter effect.

# The Brockhampton

The Arts and Crafts ethos has inspired the Brockhampton gate whose openwork timber gives security without spoiling your views.

Although designed with rural properties in mind, the Brockhampton looks equally good in an urban setting.

# The Hampton

The Hampton gate has been designed with grandeur in mind. The greater solidity of the design is lightened by the openwork timber which is enhanced by a choice of gorgeous, handmade ironwork for a truly individual effect.

Hampton – bespoke for castle

Hampton – detail

# The Moreton

This gate uses four inch oak instead of the three inches used in most of the Oak Leaf Gates designs.

This makes the Moreton both heavier and stronger, giving a powerful effect to the geometric, timber and ironwork.

Moreton – centre style detail

# The Lutyens

As the name indicates, this gate, made in four inch oak, is inspired by the great English architect, Sir Edwin Lutyens.

Lutyens designed a similar gate for the great country house of Goddards, which he built in Surrey at the end of the 19th century.

Aconbury – six bar

Whitney – painted

# Estate

These gates come from a farming and country estate tradition and reflect the single, straight top, country gate look for a more rural effect.

The choice ranges from the classic five bar gate, the Aconbury, to the grander Hampton, a combination of oak and steel.

# Garage doors

At Oak Leaf Gates we believe that garage doors should be as beautiful as the rest of your home. Nothing looks better than solid oak which never goes out of style and gives excellent security. As with our gates, our garage doors are also suitable for automation.

# Garden doors

Garden doors give privacy and security and can be positioned in a wall, a hedge, at the rear or alongside a house.

Our garden doors are available in any size or shape and are made using the same substantial construction as all our larger gates with a mortise and tenon frame.

# Posts, Frames and Jambs

We supply all the necessary posts, frames and jambs in oak to suit your gates.

The Dewchurch post has a simple, four way, sloping top, the Breinton has a half round top and chamfered edges while a grander effect is created by the Lyde and Vowchurch posts.

# Materials and finishes

We only use oak which has been seasoned naturally and which comes from well managed and sustainable English and European sources.

Oak is one of the finest and most beautiful hardwoods and our solid oak gates can be left to weather to a natural, silvery grey.

We also provide a choice of finishes, which include oils and high build wood stains such as Sikken's, which show the natural beauty of the wood and, if well maintained, will keep the gates looking superb for many years.

# The process

Oak Leaf Gates has built its reputation on supplying the whole package to the highest standards, from design and production to installation.

We work closely with our clients to create the gates or doors which are best suited to their needs and which will sit beautifully with the appearance of their homes and gardens.

We can supply gates from our range in the brochure or we can create a bespoke product which will be unique to you.

After a site visit, we will provide detailed drawings to give you a clear picture of how your gate will look. We can install gates on brick or stone piers, in walls, in fences or in hedges and all our gates can be fitted with automated opening systems.
