| B/R | ● | | | | | n/a | S | Very High | | Creates waterproof, breathable seal - protects against frost | | 29 |

Welcome to the Johnstone's Colour Selection. Johnstone's has been manufacturing paint since 1890 and offers a wide range of professional colours and finishes. Whether you are planning to transform the interior or exterior of domestic or commercial premises you are sure to find what you are looking for. This collection has been arranged by colour family and if you cannot find your exact shade, the Johnstone's tinting system offers a further 15,000 colours.

If you are still not entirely convinced you have made the right choice, Johnstone's offers a range of tester pots giving the opportunity to visualise the colour in situ and gauge how it changes in certain lights and at different times of the day.

For extra help in creating your own colour scheme visit www.johnstones-paints.co.uk where you have the opportunity to colour your own room or building, using Johnstone's Virtual Painter.

ColorXpress Colour Matching Service

Our unique colour matching service is fast, accurate and free of charge. Our ColorXpress Technologists will ensure you get a perfect match to samples of paint, fabric, wallpaper and even tiles. You'll never settle for the nearest colour again!

To see the full range of colours available consult the Johnstone's fan deck or colour display stand, available at all Johnstone's Leyland Decorating Centres and all good professional decorating outlets.

If you cannot find the exact colour you are looking for, the Johnstone's tinting system has a further 15,000 colours for you to choose from.

The colour you choose for a room can alter your visual perception of the space and change the mood significantly. Using the colour wheel you can create a balanced scheme around your chosen colour.

Tonal:

These are colour variations of the same main colour group on the colour wheel. They can be used to create a room with a harmonious and relaxing feel.

Contrasting:

Contrasting colours sit opposite each other on the colour wheel. Stronger colours can give a more dramatic look, whilst lighter shades tend to create a more subdued atmosphere.

Harmonising:

Colours adjacent to each other on the colour wheel are known as harmonious colours. On their own, harmonious colours look very different but together they can create an elegant feel in any room.

For free assistance on colour scheming and suitability, contact our Colour Advisory department on 01924 354103.
