

# Stabilised Gravel Paving

## StableEDGE

### FLEXIBLE ALUMINIUM EDGE RESTRAINTS.

StableEDGE edging restraints provide an unobtrusive and easily installed system for determining the perimeters of pathways, parking areas, courtyards, and hard standings.

Flexible enough to create smooth, flowing curves as well as straight lines, and strong enough to cope with mechanical compaction of adjacent materials, StableEDGE restraints offer a productive, cost-effective, and attractive solution to any bound surface.

**The concept is an elegant edge detail solution suitable for use with:**

- Standard Asphalt
- Coloured Asphalt, including for use in the segregation of colours
- Resin bound and resin bonded surfaces
- Self binding pathway mixes
- Stabilised gravel systems
- Poured rubber toppings

Depth:	No of Lengths	Metre run per pk.
18 mm	50	121.5
25 mm	28	67.2
38 mm	22	52.8
50 mm	19	45.6
64 mm	17	41.4
75 mm	13	31.2
100mm	10	24.0
150mm	8	19.5
