

# Marks and Spencer

CAS designed and manufactured a prefabricated boiler plantroom for the new Marks and Spencer's store in Longbridge.

The final solution featured the following services:

- A modulating gas fired boiler with an output of 380kW.
- A single head LTHW circulating pump.
- A vacuum de-gassing unit complete with a 450 litre expansion vessel.
- Controls, lighting/emergency lighting and small power.
- Internal drainage

The finished plant room was 6.0m x 4.0m x 3.0m high.

**See reverse for schematic arrangement.**
