Lift the lid  
and see the  
difference

Twyford  
FOR LIFE

No rim means it's easy to clean with nowhere

for germs to hide.

The brilliant new range of **Rimfree®** toilets from Twyford.

# THE DIFFERENCE IS CLEAR WITH OUR EASY TO CLEAN DESIGN

Ultra-hygienic design makes cleaning Twyford Rimfree® toilets faster and easier. With no rim there's nowhere for dirt and germs to hide, and no rim shadow means the bowl looks brighter. The flushing system clears away residue effectively and regular cleaning is simpler than ever before - taking less time and less cleaning products.

- 1** Water cascades into the toilet pan from a slot at the back of the bowl. Holes at either end of the slot act as jets, powering water right around the bowl and rinsing it clean quietly and effectively.
- 2** Smart design ensures that water enters the bowl at precisely the right angle to maintain its speed and force. The shape and size of the toilet sump means that the pressure of the water pushes the contents away quickly and smoothly.
- 3** With no rim the bowl looks cleaner.

Scan this code to see the Rimfree® toilet in action.

## COMPARE AND CONTRAST

Conventional toilets have a large number of holes under the rim, or a narrow slot running its length. It's almost impossible to properly clean under the rim.

By cleverly redesigning the bowl and the flushing system, Twyford have done away completely with the need for a rim - making the toilet design ultra-hygienic and easy to clean.

# MAJOR BENEFITS FOR EVERY APPLICATION

## LIGHT ON CLEANING

Without a rim, regular cleaning is quicker and easier than ever before - a quick wipe over with a cloth produces sparkling results every time. And less cleaning products are used, as there's no need to squirt under the rim to get rid of dirt and germs - which is good for the environment.

Outside is easy to clean too - with the fully back-to-wall design of the Moda close coupled toilet and wall hung design in 3D and Galerie. There are no awkward places for dust to gather.

## LIGHT ON WATER USAGE

The Moda Rimfree® uses Twyford's unique Flushwise® 4 and 2.6 litre dual flush technology, using up to 60% less water than a standard toilet. 3D and Galerie feature water-saving dual flush too, at 4 and 6 litres.

## AND STYLISH TOO

Moda

3D

Galerie

Rimfree® toilets are available across three best-selling Twyford collections - all with cool, contemporary design and a wide range of options including basins, bidets and furniture, co-ordinating to create a complete look for every bathroom environment.

### AWARD WINNING DESIGN

The 3D wall hung pan has recently been awarded the **Plus X award** which is the World's biggest Innovation prize for Technology, Sport and Lifestyle.

# YOUR QUESTIONS ANSWERED

## **If there is no rim, what stops the water coming out?**

The toilet bowl is cleverly engineered to ensure that the jets of water flow right around it and down in a cascade.

## **Why do we have rims on toilets in the first place?**

Typically the technology used in WCs has traditionally depended on there being a lot of outlets for the flush water, all hidden under a rim which guided the flow. The design of our Rimfree® toilets is the result of years of development, designing both a bowl and a jet system which do away completely with the need for a rim.

## **How can I be sure the flush is effective?**

The Rimfree® system jets water around the bowl more forcefully than a standard toilet, cleaning it efficiently and forcing the contents down into and out of, the sump - producing outstanding flush results every time.

## **How hygienic is the Rimfree®?**

Twyford's Rimfree® technology was initially developed to meet the stringent demands of the Department of Health's HTM64 guidelines, designed to minimise the risk of infection in healthcare applications.

## **What cleaning is required?**

Probably far less than with a conventional toilet. Any soiling of the bowl remaining after the flush is easier to see and deal with. There's no rim to clean under, which saves time and energy and reduces the amount of cleaning products needed. The outsides are designed for easy cleaning too.

## **What are the benefits for your project?**

Rimfree® toilets achieve professional performance levels. They look - and are easy to clean and maintain, which gives users confidence in the levels of hygiene. Less time and money is spent on cleaning, and water usage can be significantly reduced too.
