

trakkit® Quest are suppliers of a comprehensive range of **runners**® sliding door gear, which covers virtually every application from basic single sliding doors to complicated stacking/folding systems - whatever your application we are confident we can help.

CAPACITY UP TO **45kg** PER DOOR

Page 47

Gemini

Wardrobe twin sliding track

trakkit® Gemini allows the sliding of two or more doors with a maximum weight of 45 kg each door. The reversibility of the hangers enables the application of doors with a thickness of 16-40 mm, meeting the most diverse requirements of manufacturers and designers. The combination of the aluminium track with the ball bearing nylon wheels guarantees a silent operation, and the use of the adjustable 4-piece floor guide eliminates the need to make a groove under the door.

trakkit® Gemini is available as a complete kit for 2 doors with standard lengths, as well as an accessory pack to allow up to two additional doors to be hung. Gemini is a twin-track system especially suitable for lightweight applications such as cupboards and wardrobes. Pre-drilled for soffit fixing, dispensing with the need for brackets.

CAPACITY UP TO **80kg** PER DOOR

Page 48

Quiesce

Single sliding track

trakkit® Quiesce features aluminium tracks and is suitable for sliding doors with carrying capacity up to either 40kg or 80 kg. The combination of the aluminium track and the rollers with nylon wheels set on needle bearings enables a smooth and quiet sliding operation. Thanks to the dovetail of the aluminium track's upper face, the wall mounting with the fixing brackets is really quick and easy. Suitable for both internal and external locations, the smooth, silent action of **trakkit**® Quiesce makes it ideal for applications in hotels and hospitals, or where quietness and ease of operation is paramount. All moving parts are lubricated for life.

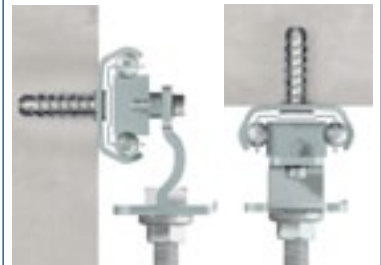

CAPACITY UP TO **60kg** PER DOOR

Linear

Single sliding track

trakkit® Linear is a straight sliding door gear kit, face or soffit fixing, for 'middleweight' and commercial applications. The precision ball bearing slide provides a smooth operation and durability. **trakkit**® Linear includes interchangeable accessories for either horizontal or vertical rail fixing.
