Cast Iron Wood Stoves

Cast iron multi-fuel & wood burning stoves are an increasingly popular method of generating heat for the home. In addition to being environmentally friendly, particularly when used with sustainably sourced fuel, they bring a great deal of character to any room. Our stoves are cast in heavy duty iron and finished to a very high specification:

- 8mm Cast Iron
- High temperature heat resistant paint
- Dual Air Flow Controls
- High Efficiency
- Secondary Eco-Friendly Combustion
- Raised Burning Grids

Cast Iron Fountains

Four Faces
FOU003

Weight (kg): 900
Dims (cm): 300x180

The largest model of cast iron fountain we hold is the 'The Majestic,' standing a regal 4 metres. 'The Four Faces,' (pictured to the left), is identical, but without the top layer. Both are finished in red primer, ready for painting.

Our smaller 'Twin Cherub' fountains are similarly primed, but also finished in an antique white designed to weather over time. For maintenance purposes, we recommend external installation of pumps, although internal fitting is simple.

Staddle Stones

Staddle Stones are an ideal support for the uprights in oak framed buildings. We offer granite and sandstone models in straight, tapered and drum profiles in a range of sizes to suit a variety of oak posts. Staddle stones are also referred to as Pad Stones or Settle Stones.

Faux Lead Fibreclay Planters

Fibreclay is produced via an innovative and patented process that combines fibre recovered from the waste material of pulp mills with clay. The result is an extremely solid material with rigidity similar to that of plywood. It is particularly suitable for use in planters as it is durable, frost & UV resistant and develops an aged appearance through weathering. Fibreclay planters are extremely environmentally friendly. In addition to being produced from waste materials, the energy usage in their manufacture is only 10% of that for other planters.

Faux Lead Fibrestone Planters

Fibrestone is an ideal material for the manufacture of planters. Whilst it offers the durability of Fibreglass, it still manages to retain a solid, heavy feel, courtesy of the stone powder mixed into the composite. The result is an authentic, attractive planter that provides years of cost effective service. Unlike Fibreclay, which emits salts, Fibrestone will not patinate greatly through exposure to the elements. Fibrestone should be your choice of material if you would like your garden planter to maintain a consistent appearance.

Easter Island Heads

The inhabitants of the Polynesian Island of Rapa Nui carved 'Moai Statues', or Easter Island Heads, between 1250 and 1500 AD to commemorate their ancestors. The largest stands over 10m tall. Their construction and transport is seen as one of the great feats of mankind.

Whilst Round Wood Trading have dealt in other Easter Island reproductions in the past, the decision was made to develop an exclusive, more portable and practical range that does better justice to the originals. The result are Easter Island Statues that retain a solid and authentic feel, but weigh less than their smaller reconstituted stone or concrete counterparts.

The range includes a mega 205cm model, the largest available in the world on a non-bespoke basis. Despite their lofty stature, they weigh a manageable 130kg. This has been achieved through casting and sculpting with a frost-proof, malleable concrete and fibreglass composite that allows for a thick layer to be crafted around a hollow mould.

Terracotta Warriors

On 29th March 1974, seven Chinese farmers set about their daily business of digging irrigation wells in Xi'an, Shaanxi province. Hours later they had made one of the most important archaeological discoveries of modern times - an army of Terracotta Warriors stood ready to march into the after life with their creator, Emperor Qin Shi Huang.

Whilst these statues have been faithfully recreated in China, they are produced from an innovative concrete composite – not Terracotta. This ensures they are durable and frost proof. For added strength, they also contain a woven internal fibreglass mesh. The original Terracotta Warriors varied in size according to their status. Our exclusive recreations are the only full-size models available in the UK, standing at 1.88m. A 1m metre half-size model is also available.

Reclaimed Oak Barrels / Wagon Wheels

Our Oak barrels were used for one season in France to age a fine Burgundy, with many still bearing the marks of their Vineyards. They have a capacity of 225 litres, (just under 50 imperial gallons). As our barrels are hand coopered in French Oak, colouring and finishing may vary, but they are generally light in appearance, making them perfect for sitting on a deck.

They are also ideal for conversion to a water butt – a process we can carry out. This involves drilling an 80mm hole into the top to take a standard downpipe and a 25mm hole into the front for the supplied tap. We also offer our barrels as halves - which make ideal planters.

Oak Barrels

Unconverted BAR001

Converted BAR002

Weight (kg): 30 Dims (cm): 95x69

Half Barrels

BUT001

Weight (kg): 15 Dims (cm): 45x69

Oak Wagon Wheels

WAG001

Weight (kg): 25 Dims (cm): 75x75x15

Our Oak Wagon Wheels, reclaimed from France & Germany, vary in size. As such, please note that the dimensions provided are approximate.

Portuguese Slate Tables

Our table tops are cleaved whole from a single piece of Portuguese slate. They are supplied with 14cm square solid oak legs, which are available in a selection of heights. This combination provides a unique and high-end garden feature.

Chunky Slate Table

1.8m x 0.9m Rippled Slate, 7cm thick

Heights available: SLA001L - 95cm
SLA001M - 80cm
SLA001S - 50cm

Square Slate Table

1.2m x 1.2m Smooth Slate, 3cm thick

Heights available: SLA002L - 85cm
SLA002M - 70cm
SLA002S - 40cm

Staple Pins / Wrought Iron Items

Steel Staple Pins

Used for connecting sleepers that are being placed to set a bed/border. Available in two sizes, with the larger ideal for connecting corner pieces. To install, simply pre-drill holes for the staples to then be tapped into.

Ornamental Wrought Iron Arches & Seats

These features are all traditionally hand wrought in heavy gauge iron. The metal is left unfinished, allowing for the development of a natural rust finish.

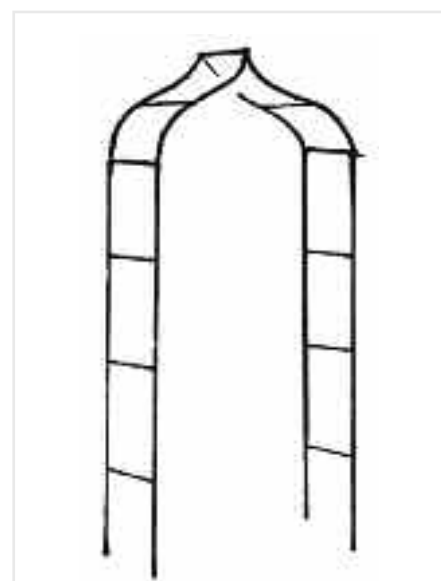

The plain, temple and scroll rose arches, however, are also available in a black matt powder coated finish.

Solar Bugs / Crazy

Our solar bugs are the ultimate environmentally friendly toy. All that is required for these crazy crickets to jitter around is direct sunlight. Artificial light does also work, but it has to be very strong and undiffused.

These little critters are also educational, with the sensitivity of their solar panel demonstrating solar power in its rawest form. Any cloud cover or shadow restricts their jitters, but on a clear day they go like the clappers. Available in a selection of exclusive colours and individually packaged.

Ages 6 and up.
