DESCRIPTION

An ever popular choice for schools and children's playgrounds, our Flexa-Rail range is the perfect solution for safety perimeters. With our standard bow top approved by the Royal Society for the Prevention of Accidents (ROSPA) for use around play areas, you can understand why this is a popular selection.

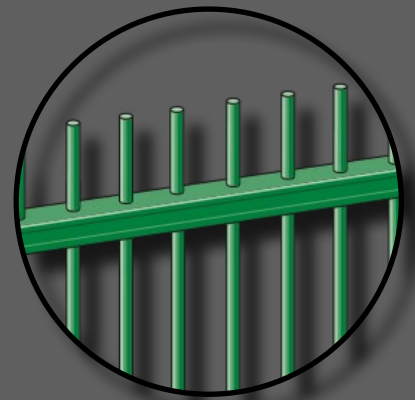

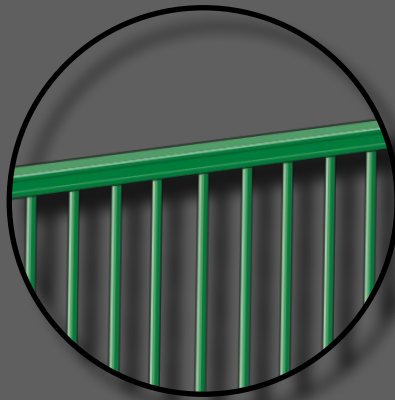

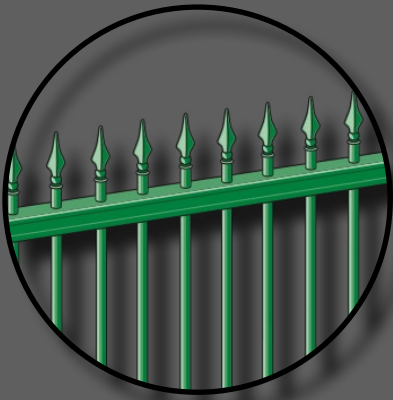

The vertical tubular bar metal railings are available in a variety of heights starting from 900 up to 2400mm. So when your physical security needs to be ramped up, Flexa-Rail offers sites taller panels creating a formidable

barrier around school perimeters, with varying options for the top. Flexa-Rail doesn't even cause problems on uneven ground, with its revolutionary self-raking metal railings following the contours of steep gradients without the need for stepping.

FINISH

This system is hot dipped galvanised and polyester-powder coated after stringent cleaning and treatment to give a well adhered coating of a minimum of 60 microns. Also available in a wide range of RAL colours.
