Play Equipment *Abstract*

Setter Play recognise the limitations that some conventional play units can have; traditional play units may look like a grown up's idea of playground equipment featuring a tower with a roof but sometimes designs like these can be limiting to the imagination. A tower with a roof is invariably 'a house'. We have therefore come up with a range of play units that do not prescribe how to play. The units are designed to develop free form use. Play is not dictated by the need to go up steps, over a platform and down a slide for example. Instead children are challenged to explore the three dimensional space that the unit occupies. Our abstract units can be explored around the outside, up the inside, over the top and through the middle. There is no right or wrong way to play.

Spiffy

Spiffy is designed to stimulate the core development requirements of KS1 children.

A tube net is the hub of the unit which is the catalyst to explore all points from the inside out. The outside faces of the unit provide challenges to enable a complete traverse to be achieved. Grip and grasp are challenged via the over head wedge ladder, balance and strength challenged through the rock traverse walls, a wavy overhead bar provides a destabilising influence whilst trying to cross the foot rope, a spider's web net provides a climbing and crossing opportunity with a difference. A fun crossing is provided by a swivel step that rotates 180 degrees, completing the circuit.

Vibe

Vibe is available in either a 900mm high deck or a 1500mm high decks.

The standard activities on the 900mm high unit are a vertical traverse net, the barrel climber, scramble net, drop rope traverse and the HDPE slide, a play bench/table provides low level accessible play.

The 1500mm high unit features an overhead ladder and the trapeze hoop crossing, scramble net and rockwall climbing surfaces.

The design of 'Vibe' allows for the creation of custom variations so we can tailor the activities and shape of the unit to fit your needs and location.

Zippy is Vibe's big brother featuring a second podium tower linked by an arcing traverse net. This expansive unit can accommodate a large number of children with a range of ability levels from the physical trapeze hoops and overhead ladder to the calmer rope rungs and step bench. The unit continues the theme of the Abstract range by allowing children to explore the activities from all directions and points of access. The activities such as the overhead ladder can be used as a standalone feature or as part of the route to negotiate the equipment. The podiums act as a vantage point between traversing challenges and provide a non prescriptive space above and below decks.

Pyramid

Pyramid was the first of Setter abstract climbers designed to be a modern take on the old Jungle Gyms of the 1970's. The great thing about Jungle Gyms was the lack of direction for use. There weren't any platforms, nor slides, nets or roofs to dictate play. We decided to emulate that ethos but update the design to feature an innovative (if ancient) shape combined with modern materials and activities.

Pyramid is a challenge for older children, featuring climbing activities throughout; unusual wavy rungs, challenging net platform and tube.
