

Hydrotech® Discfilter

A Flexible Filtration System

Solutions & Technologies

An ideal Filtration System for Fine Solids Removal

The Hydretech® Discfilter was introduced in 1995 as a direct response to the demands for a cost-effective, reliable, compact package tertiary filtration process

KEY CHARACTERISTICS

- **Sturdy and compact design**
Available in 304 or 316 stainless steel
- **Cost-effective technology**
OPEX & CAPEX savings compared to sand filtration
- **Small footprint**
75% smaller than traditional sand filter
- **Automatic backwash**
Continuous filtration during backwash
- **Minimal maintenance**
Components requiring periodic maintenance are easily accessible from outside the Discfilter
- **Capacity up to 1,000 l/sec per unit**
Unlimited capacity with multiple units
- **Modular filter elements**
Fixed barrier woven polyester from 10 micron filter media

Temporary and Pilot units available
