Description

Sanitisation Point CABRAL is a hand sanitisation station for crowded places both indoors and outdoors.

Providing adequate hand sanitiser for busy public and private places such as hotels, amusements, healthcare centres, parks, gyms, can be difficult due to overcrowding and environmental conditions.

For this purpose, CABRAL has been created: available in two versions, one for indoors and one for outdoors. Thanks to its unique design, it can be installed in every context, providing an essential sanitiser facility.

CABRAL is available in 10 standard colours with white or black "Sanitisation Point" pad printing, placed only on one side. It is possible to customise the other lateral side with stickers upon request.

It comes with an aluminium internal profile and insulating material, to offer further protection to the sanitiser.

CABRAL is equipped with a base plate: it can either be simply positioned on the floor or, if securing and stability is needed, the pre-drilled holes on the base allow fixing through dowels. An accessory for implantation on soft soils, such as sand, is available.

In case of outdoor installation with strong and prolonged sun exposure, it is recommended to place CABRAL sheltered from direct sunlight.

Materials

Indoor Version: powder coated aluminium with base plate

outdoor Version: powder coated aluminium with base plate and internal profile for insulating

Dispensing spout: chromed finish

Dimensions
