

### StreetStore

#### Dimensions in mm for a 6 bike unit

Width 3300  
Depth 2000  
Height 1490

### Overview

The StreetStore is a new concept in secure cycle parking, offering a wide range of options. The units are modular and can be either lockable or open access, offering weather protection and extra security. They can be customised as required. Designed and patented by Cycle-Works and manufactured in the UK, the StreetStore is an innovative design made by modern, precision engineering techniques, involving a strong monocoque construction with a modular framework.

The StreetStore can be a 1, 2, or 3 bike unit depending on the site requirements. Units can be installed on their own and are free standing without the need for expensive ground works. Should the site require parking for more bikes multiple StreetStore's can be joined together in any of the various combinations.

Offering a high degree of customisation the StreetStore can be installed with various locking options, and a wide range of colours and cladding materials.

### Features & Benefits

- Securely locks bike out of sight.
- Space efficient – small footprint.
- Comes with optional door.
- Easy-to-use and suitable for use in schools.
- Can be scaled up to hold large numbers of bikes.
- English design and fabrication.
- Made from strong pre galvanised Steel.
- Can be coloured in any standard RAL colour.
- Advertising potential.
- Requires no expensive groundworks.

The Cycle Storage Specialists

## StreetStore

### Open, half or full length door?

One of the many advantages of the Cycle-Works StreetStore is the option to include a full length high security 2 point locking door. The door seals the unit offering a very high level of security and a strong visual deterrent. The lifting of the door is aided by internal gas struts resulting in an effortless and balanced motion. When the door is fully opened it is held open allowing easy access to the unit. When you are finished the door is easily lowered with minimal effort and locked, much like the system widely used on car boots.

The StreetStore is available with a half door option which offers greater weather protection and security than the open access model but without the need to issue keys to users. This multi-bike unit is available as standard with open access and our own high security multi locking point rack inside.

### Locking Mechanism

Secure system - pushes in when locked, pops out when unlocked. Handle turns the locking mechanism 90°. Reliable, proven system. This locking mechanism is flush when closed it makes it very hard for a brute force attack.

### Advantages

- Designed for moving substantial door closures.
- Cylinder locks handle into place
- Easy to get replacement parts
- Most locksmiths know this system
- Difficult to pick the lock
- Handle is flush with the unit when locked
- No leverage points
- Hardened Steel to resist drilling

Abloy lock - closed

Abloy lock - open

**"The residents are very pleased as they are now able to put their bikes in the StreetStore rather than having to have them in their flats and carry them up and down the stairs."**

Tristar Homes Ltd, Chris Peters - Patch Manager

### Colour Options

The StreetStore is available with its door, roof, back, upper and lower side panels and frame work in any standard RAL colour. If you have specific brand colours that need to be used then we can colour match them and find a combination that best suits your site and environment. This not only adds to the life of the StreetStore by protecting the metal but also means it is able to seamlessly blend into any location. The side panels can also have a graphic perforated into them.

## StreetStore

### Grouping

With this combination of unit sizes and optional secure door the StreetStore can be easily scaled up to meet the exact requirement of your site. For example, that can be a 4 bike 'open-access' unit, next to 2 closed and secure 3 bike units, giving parking for 10 bikes just over a 5 metre space.

If no door is fitted the unit still offers good weather protection and high security for the bikes. If there are no doors or fixed panels then the centres will be 400mm.

### StreetStore Unit Sizes

Bikes parked	Width (mm)	Depth (mm)	Height (mm)
1	700	2000	1490
2	1100	2000	1490
3	1500	2000	1490
4	2500	2000	1490
5	2900	2000	1490
6	3300	2000	1490
7	3800	2000	1490
8	4200	2000	1490
9	4700	2000	1490
10	5100	2000	1490

### About Cycle-Works

Cycling is our passion. We believe that cycling is good for people, good for society and good for the environment. This belief underpins everything we do. We believe that the provision of quality facilities will increase the use and acceptance of the bicycle.

All our employees and associates cycle regularly in diverse disciplines such as commuting, touring and long distance audax rides. We are active in both local and national cycle campaigning.

### Our Products

- Individual bicycle lockers
