## Edward Bingham

Commander Edward Bingham's bravery and leadership at the Battle of Jutland led to him being one of the few naval personnel awarded a Victoria Cross during the First World War.

The son of Lord Clanmorris, Bingham entered the Royal Navy in 1895. On 31 May, 1916, Commandeer Bingham led a destroyer division into attack: first on enemy destroyers and then on the battle cruisers of the German fleet. As the enemy was sighted, Bingham commanded his destroyer HMS Nestor and the one remaining destroyer HMS Nicator, to move in close enough to fire torpedoes. Nestor and Nicator withstood heavy fire until Nestor was sunk and Bingham picked up by the Germans.

He remained a prisoner until the end of the war.

Woodland Trust, Digitally Printer Timber (bespoke)

Hatfield House, Fingerpost - pg 19

Leybourne Lakes, Monolith - pg 17

## RSPB SHERWOOD FOREST

This legendary place needs no introduction, in fact the motto is 'Where legends grow'. Sherwood Forest is managed by the RSPB in a partnership with Nottinghamshire County Council, Sherwood Forest Trust, Thoresby Estate and The Woodland Trust.

Cafeteria Design rebranded this very iconic site, with Landmark producing the entrance and car park signage timed to coincide with the launch of the new visitor centre. Simple yet striking branding ensure these signs stand out and as the timber gradually weathers down will provide a perfect introduction to this remarkable place.

Following this, we manufactured and installed the wayfinding and it looks equally eye-catching. No power tools were used in the installation to minimise the disturbance to surrounding wildlife, and SSSI-quality installation ensured zero contamination of the ground.

Robin Hood is undoubtedly the most famous resident of the Forest, however the Major Oak was here before him (apparently it's around 1000 years old). Other residents who enjoy living here included the lesser spotted woodpecker and the tree pipit.

We look forward to continuing the work with RSPB and their partners at Sherwood!

## HOVETON GREAT BROAD

We couldn't improve on their own description on the website 'Hoveton Great Broad is one of the largest yet most secret lakes in The Broads.'

This wonderful gem in the heart of The Broads is undergoing a transformation overseen by Natural England, who we were privileged to work with on this special project. No less than £4.5 million is being spent on restoring the 37 hectare lake and upgrading the Nature Trail.

The brief was to design a suite of wayfinding signage which is waterproof (in fact might be underwater some of the time), weatherproof, sympathetic with the surroundings and informative. A minor point was that the Nature Trail can only be reached by boat!

We are proud to have been chosen by Natural England to work with them, and we partnered with The Way Design who produced some amazing content and a complete 'family' of complementary signage. If you like what they produced, just drop an email to Howard Swift [howard@thewaydesign.co.uk](mailto:howard@thewaydesign.co.uk) find out more!

Fabrication took place off site and the signs were shipped together with the installation team across the Broad. Conditions were perfect for installation (and photography as the pictures show) and the first stage of the project was successfully completed in June 2017.

# Interpretation

Bring your destination to life with our team of interpretation specialists. Landmark have completed interpretation projects for many iconic locations, bringing history, geography and culture together for all visitors in a dynamic and engaging way.

## Welcome to Queen's Marsh

Part of the Dartington Hall Estate; 1,200 acres of land managed for wildlife to flourish in a mosaic of different habitats.

### Wonderful wetlands

**Where land and water meet**  
In addition to providing valuable wildlife habitat, the marsh acts like a sponge, absorbing rain water and preventing flooding further downstream. Pollutants are purified by the mix of plants and 'good' bacteria. Wetlands can also lower the temperature around them, providing climate control on hot days and may help to combat future climate change.

- "The wildlife and habitats we all enjoy rely on people's good efforts and I am very proud to help in those efforts"
- Neil Lamont, Volunteer

### Queen's Marsh – Past, present, future

- 1881-1400: Dartington Hall built by John Holland, half-brother of Richard II
- 1490-1590: Queen's Marsh was a tidal creek – Boats travelled up the Bideford
- 1584: Construction of Totnes Weir – Turned Queen's Marsh from a creek into a wetland
- 1590: Attempts to drain the field to create arable land for farming – This practice continued for many decades
- 1875: Queen's Marsh designated as a County Wildlife Site – 34 species of plant recorded
- 1925: Leonard and Dorothy Ehrhart bought Dartington Hall – Pioneering forestry, farming, art and educational projects established
- 1975: A high point for biodiversity – After this time, records show a decline, possibly due to farming practices or water pollution from nearby Tyeed Mill
- 1990s: Dartington's first conservation warden employed to look after wildlife – Work began to restore habitats, including creation of the ponds in Barnham's Marsh, which was paid for with a bottle of whisky!
- 2017: Conservation management and habitat restoration work supported by the Environment Agency – Creation of ponds and scrapes in Queen's Marsh, restoration work to Bideford Brook, planting of reeds and wildflowers all provide wildlife benefits and reduction of future flood risk
- 2017: 2nd Hils designed and built by University of Plymouth architecture students, taking inspiration from the soundwave of a Kingfisher's call
- 2020+: Change continues – Conservation volunteers monitor the health of the habitats by recording the insects, bat populations and bird species

Find out more:  
[dartington.org](http://dartington.org)

Please keep dogs on leads around livestock and during ground nesting bird season (March to July).

With thanks for support from:

### What can I see?

This area is home to a variety of wildlife from otters and fish to birds and bats. Look for differences throughout the seasons.

In spring and summer, enjoy flowers in bloom and the buzz of insects. You may see bats hunting at dusk.  
In autumn and winter, flooding attracts flocks of waterbirds.

### Lesser Horseshoe Bat

*Rhinolophus hipposideros*

**Season**  
Summer  
Winter: September to April

One of the smallest British bat species  
Look for them flying just after sunset or before dawn – they roost during the day with wings folded around body  
Flies up to 5m above the ground, searching for prey over vegetation

### Eurasian Otter

*Lutra lutra*

**Season**  
Winter Spring Summer Autumn

Used to be hunted for its fur and to protect fish stocks  
Secretive – the most likely evidence is a spraint (dropping)

Webbed to aid swimming

Sensitive hairs help to locate prey (mostly fish)

Strong to propel through the water

**Size**  
100cm (including tail)

Ears and nose can be closed when underwater

**Size**  
25cm

## Under the limelight

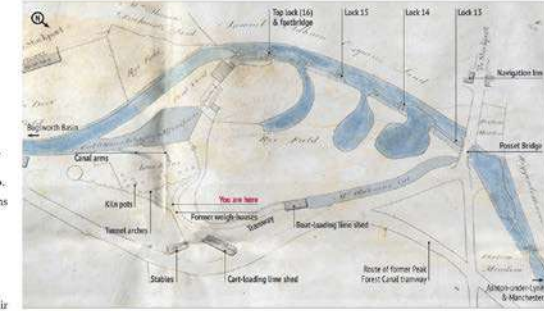

Samuel Oldknow built these lime kilns. Limestone was heated inside to become burned lime, or quicklime. This was used to improve soil, make lime mortar and for bleaching.

### Right place, right time

Oldknow built the lime kilns in 1790/92 to take advantage of the Peak Forest Canal. Large loads of bulky limestone could be transported from Derbyshire quarries and unloaded directly from boats at the top.

Oldknow wanted the lime kilns to look like a medieval castle from the opposite side of the Goyt Valley.

In 1965 the lime kilns were protected as a Scheduled Monument. At the time they were in a poor state of disrepair and funds could not be raised for their repair. Following large-scale demolition, only part of the facade survives.

### 1818 plan of Lime Kilns

Making lime was dirty, dangerous work. Broken limestone and coal were barrowed from narrow boats and tipped into the kiln pots. Quicklime was transferred through the tunnels to tramway wagons and then in to loading sheds. Workers loaded the quicklime into covered carts and canal boats for onward transport. Stables sheltered the horses needed to pull the boats, tram wagons and carts. The buildings that remain are now private houses.

Discover our lime app and so much more, visit [OLDKNOWS.COM](http://OLDKNOWS.COM)

County is a beautifully natural family of co-ordinated, engraved timber signage. Designed to be personalised to suit your signage requirements, making them perfectly adaptable for countrysides, National Parks, AONB's, Heritage properties or any other environment where the beauty and simplicity of timber can enhance the experience.

## DISPLAY SIGNS

### ABERDEEN A 71001 / ABERDEEN B 71002

- Digitally printed aluminium composite graphics panel surrounded by air-dried oak overframe and mounted on hardwood ply backboard, fixed to fresh-sawn oak posts.
- Standard graphics panel sizes (mm): A0 1189x841, A1 894x594, A2 594x420
- Posts 100x100x2400mm
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- HardRok graphics panel (10 year anti-fade guarantee)
- Header/footer boards
- Printed inserts and discs
- Softwood or recycled plastic

#### Examples show

Graphics panel: A1 841x594  
Post tops: round  
Engraved header board  
Printed inserts on footer board  
Engraved text  
Printed inserts

## DISPLAY SIGNS (WALL MOUNTED)

### ABERDEEN C 71003

- Digitally printed aluminium composite graphics panel surrounded by air-dried oak overframe and mounted on hardwood ply backboard.
- Standard graphics panel sizes (mm): A0 1189x841, A1 894x594, A2 594x420, A3 420x297, A4 297x210
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- HardRok graphics panel (10 year anti-fade guarantee)
- Softwood

#### Example shows

Graphics panel: A1 841x594

## DISPLAY SIGNS (LECTERN STYLE)

### ABERDEEN D 71004

- Digitally printed aluminium composite graphics panel surrounded by air-dried oak overframe and mounted on hardwood ply backboard, with metal brackets fixing to fresh-sawn oak posts.
- Standard graphics panel sizes (mm): A0 1189x841 (4 posts), A1 841x594 (2 posts), A2 594x420 (2 posts) A3 420x297 (1 post), A4 297x210mm (1 post)
- Posts 100x100x1500mm
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- HardRok graphics panel (10 year anti-fade guarantee)
- Softwood
- Printed inserts and discs

#### Example shows

Graphics panel: A1 841x594

## LADDER SIGNS

### BRECON A 71005 / BRECON B 71006

- Engraved and painted air-dried oak board fixing to fresh-sawn oak posts.
- Standard board sizes (mm): 600x150x25, 600x200x25, 1200x150x25, 1200x200x25
- Standard post sizes 100x100x1800/2400mm
- Morticed or face-fixed boards
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- Printed inserts and discs
- Softwood or recycled plastic

#### Example shows

Top board: 1200x200  
Other boards: 1200x150  
Engraved text  
Printed inserts

Brecon A  
71005  
Face Fixed

Brecon B  
71006  
Mortice Fixed

## WAYMARKER POSTS

### OXFORD 71007

- Fresh-sawn oak posts with 4-way weathered top
- Standard sizes (mm) 100x100x2100, 100x100x1800, 100x100x1500.
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- Different sizes
- Flat, 1-way or 2-way weathered top
- Engraved and/or painted text and logos
- Printed inserts and discs
- Routed band with paint or reflective tape
- Rubbing plaques
- Softwood or recycled plastic

#### Example shows

Post: 100x100x1200(visible)  
Post top: 4-way weathered  
Engraved text  
Printed discs

## MONOLITHS

### CANTERBURY 71008

- Fresh-sawn oak with 1-way weathered top
- Standard sizes (mm) 200x100x1800, 200x60x1800, 200x60x1500
- Engraved and/or painted text and logos

#### ADDITIONAL OPTIONS

- Flat, 2-way or shaped top
- Printed inserts and discs
- Rubbing plaques
- Softwood or recycled plastic

#### Example shows

200x100x1300 (visible)  
Engraved text  
Printed insert

## NOTICE CASE

### NEWBURY A 71009

- Digitally printed aluminium composite graphics panel surrounded by air-dried oak overframe and mounted on hardwood ply backboard, with fresh-sawn oak posts. Notice case with size 4mm polycarbonate glazed side-hinged door(s) supplied with 2 keys and sand coloured self-healing pinboard.
- Standard notice case sizes: 2 x A4 sheets, 4 x A4 sheets, 6 x A4 sheets, 8 x A4 sheets
- Standard size graphics panels (mm): A1 (841x594), A2 (592x420), A3 (420x297)
- HardRok graphics panel (10 year anti-fade guarantee)
- Standard post size 100x100x2400mm
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- Engraved and painted header/footer boards
- Printed inserts and discs
- Softwood

#### Example shows

Graphics panel: A1 841x594, Notice case: 4 x A4 sheets

## NOTICE CASE (WALL MOUNTED)

### NEWBURY B 71010

- Digitally printed aluminium composite graphics panel surrounded by air-dried oak overframe and mounted on hardwood ply backboard.
- Notice case with size 4mm polycarbonate glazed side-hinged door(s) supplied with 2 keys and sand coloured self-healing pinboard.
- Standard notice case sizes: 2 x A4 sheets, 4 x A4 sheets, 6 x A4 sheets, 8 x A4 sheets
- Standard size graphics panels (mm): A1 (841x594), A2 (592x420), A3 (420x297)
- HardRok graphics panel (10 year anti-fade guarantee)
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- Printed inserts and discs
- Softwood

#### Example shows

Graphics panel: A1 841x594  
Notice case: 4 x A4 sheets

## SIGN SHELTER

### BANGOR 71011

- Digitally printed aluminium composite graphics panel surrounded by air-dried oak overframe and mounted on hardwood ply backboard, with fresh-sawn oak posts. Notice case with size 4mm polycarbonate glazed side-hinged door(s) supplied with 2 keys and sand coloured self-healing pinboard. Hardwood roof. Note: some assembly required on site
- Standard notice case sizes: 2 x A4 sheets, 4 x A4 sheets, 6 x A4 sheets, 8 x A4 sheets
- Standard size graphics panels (mm): A1 (841x594), A2 (592x420), A3 (420x297)
- HardRok graphics panel (10 year anti-fade guarantee)
- Standard post size 100x100x2400mm
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- Engraved and painted header/footer boards
- Printed inserts and discs
- Softwood

#### Example shows

Graphics panel: A1 841x594, Notice case: 4 x A4 sheets  
Engraved header board 1421x200

## FINGERPOST SIGN

### NEWPORT 71012

- Air-dried engraved and painted 550x135x25mm fingerarm with chevron end morticed into 100x100x2800mm fresh-sawn oak post
- 4-way weathered top
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- Other sizes of fingerarm and post available
- Flat, rounded or shaped fingerarm ends
- Printed inserts and discs
- Softwood or recycled plastic

#### Example shows

Post: 100x100x2453 (visible)  
Fingers: 500x135x25 (visible)  
Post top: 4-way weathered  
Engraved text  
Printed insert

## CYCLE STAND

### CAMBRIDGE 71013

- Fresh-sawn oak with engraved and painted text
- Concealed fixing
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- Printed inserts and discs
- Softwood or recycled plastic

#### Example shows

Board: 1070x150  
Posts: 150x50x750 (visible)  
Engraved text  
Printed insert

## DISPLAY SIGN (LECTERN STYLE)

### LYMINGTON 71014

- Digitally printed HardRok aluminium tray mounted between fresh-sawn oak posts.
- Standard graphics panel sizes (mm): A0 1189x841, A1 894x594, A2 594x420, A3 420x297, A4 297x210, 900x400.
- Posts 75x200x1600mm
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- Waney-edge timber (with bark left attached)
- Other size available
- Printed inserts and discs
- Softwood

#### Example shows

Graphics panel: A0 1189x841  
Posts: 200x75x980 (visible)  
Post tops: 1-way weathered

## PANEL SIGN

### KENDAL 71015

- Digitally printed aluminium composite graphics panel mounted between fresh-sawn oak posts.
- Standard graphics panel sizes (mm): 1050x470, 1500x620
- Posts 100x100x1700/1900mm
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- HardRok graphics panel (10 year anti-fade guarantee)
- Painted Tricoya graphics panel (external grade mdf)
- Engraved and painted posts
- Printed inserts and discs
- Softwood or recycled plastic

#### Example shows

Graphics panel: 1050x470  
Posts: 100x100x1100 (visible)  
Post tops: 4-way weathered

## BANNER SIGNS

### WINDSOR 71016

- Durable fade-resistant banner fixed to galvanised steel tubes and fresh-sawn oak posts.
- Standard banner panel sizes (mm): 2460x1000mm
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- Other sizes available
- Double sided banners
- Engraved and painted header/footer boards
- Painted tubes to match corporate colour
- Printed inserts and discs
- Softwood or recycled plastic

#### Example shows

Canvas banner: 2460x1000  
Posts: 150x150x2000 (visible)  
Post tops: 4-way weathered  
Top board: 2500x200  
Bottom board: 2500x150  
Steel crossbars

## A-FRAME

### CROMER 71017

- Digitally printed aluminium composite graphics panel mounted on hardwood play backboard with air-dried oak frame
- Standard graphics panel sizes (mm): A1 894x594, A2 594x420
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- HardRok graphics panel (10 year anti-fade guarantee)
- Magnetic panel
- Engraved and painted frame
- Printed inserts and discs
- Softwood

#### Example shows

Graphics panel: A1 841x594

## BENCH

### LINCOLN 71018

- Fresh-sawn oak
- Concealed fixings
- Standard size (mm): 1500x300x50 with 900mm posts for deep fixing, allowing 350mm out of ground
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- Other sizes including curved
- Stainless steel memorial plaque affixed to front
- Softwood

#### Example shows

Standard size

## BANNERPOST

### HENLEY 71019

- Durable fade-resistant double sided banner fixed to fresh-sawn oak posts
- Supplied smooth-sanded natural finish

#### ADDITIONAL OPTIONS

- Double frame (2 banners)
- Engraved and painted posts
- Printed inserts and discs
- Softwood or recycled plastic

#### Example shows

Single & double bannerposts

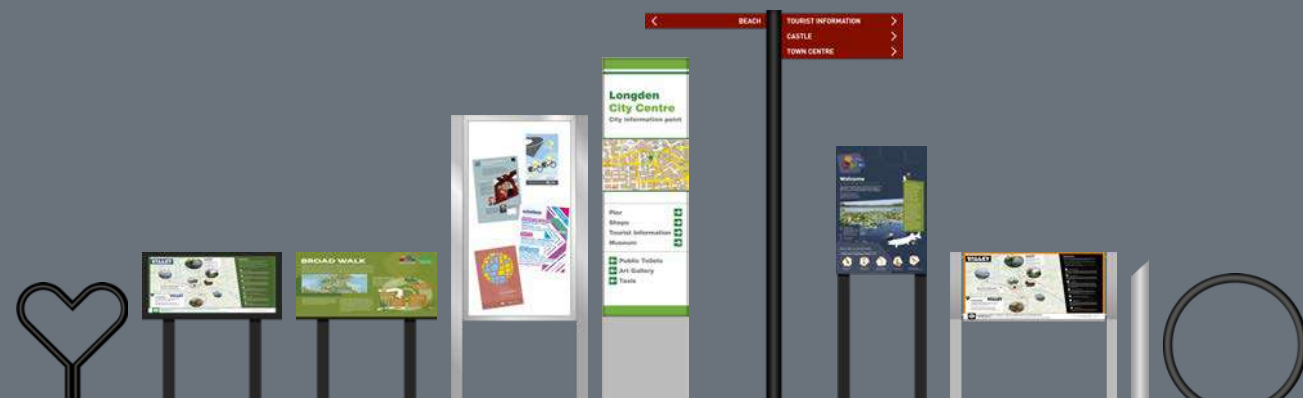

Citi brings you the elegance, durability and longevity of custom made metal signs suitable for any public space. Citi's co-ordinated range of metal signs takes care of all your signage requirements.

The Citi family range is continually growing so make sure you check our website regularly to see the latest products.

## DISPLAY SIGN (POST MOUNTED)

### CARDIFF A 72001

- Digitally printed HardRok graphics panel tray mounted to re-fixed batons
- Standard panel sizes (mm): A0 (1189x841), A1 (841x594), A2 (592x420), A3 (420x297)

### ADDITIONAL OPTIONS

- Powder-coated standard RAL colour or stainless steel finish
- Anti-tamper fixings
- Bolt-down or root-fix available

### Example shows

Graphics panel: A1 841x594

## DISPLAY SIGN (WALL MOUNTED)

### CARDIFF B 72002

- Digitally printed HardRok graphics panel tray mounted to re-fixed batons
- Standard panel sizes (mm): A0 (1189x841), A1 (841x594), A2 (592x420), A3 (420x297)

### ADDITIONAL OPTIONS

- Anti-tamper fixings

### Example shows

Graphics panel: A1 841x594

## DISPLAY SIGN (LECTERN STYLE)

### CARDIFF C 72003

- Digitally printed HardRok graphics panel tray mounted on mild steel posts.
- Standard panel sizes (mm): A0 (1189x841), A1 (841x594), A2 (592x420), A3 (420x297)
- Bolt down or root-fix

#### ADDITIONAL OPTIONS

- Powder-coated standard RAL colour or stainless steel finish
- Anti-tamper fixings
- Bolt-down or root-fix available

#### Example shows

Graphics panel: 920x550

## DISPLAY SIGN

### LONDON 72004

- Digitally printed aluminium composite graphics panel mounted in an aluminium frame on mild steel posts.
- Standard panel sizes (mm): A0 (1189x841), A1 (841x594), A2 (592x420), A3 (420x297)
- Bolt down or root-fix

#### ADDITIONAL OPTIONS

- Powder-coated standard RAL colour or stainless steel finish
- HardRok graphics panel (10 year anti-fade guarantee)
- Anti-tamper fixings
- Bolt-down or root-fix available

#### Example shows

Graphics panel: A1 841x594

## DISPLAY SIGN (LECTERN STYLE)

### PARIS 72005

- Digitally printed aluminium composite graphics panel mounted between mild-steel bent posts.
- Standard panel sizes (mm): A0 (1189x841), A1 (841x594), A2 (592x420)
- Bolt down or root-fix

#### ADDITIONAL OPTIONS

- HardRok graphics panel (10 year anti-fade guarantee)
- Powder-coated standard RAL colour or stainless steel finish
- Anti-tamper fixings
- Bolt-down or root-fix available

#### Example shows

Graphics panel: 920x550

## FINGERPOST

### VENICE 72006

- Aluminium construction
- Standard sizes (mm): 100x3000 post, 100x700 fingerarms
- Simple modular design
- 8no. mounting positions
- 45° mounting increments on single level
- Locking panel alignment
- Concealed locking method

#### ADDITIONAL OPTIONS

- Different finger arms sizes 150x 200, 250 or 300mm depth, 700, 800 or 900 width

#### Example shows

Finger arms: 800x100

Post: 100Øx2600 (visible)

## NOTICE CASE (POST MOUNTED)

### STOCKHOLM 72007

- Digitally printed aluminium composite graphics panel with steel backboard mounted between aluminium posts.
- Standard panel sizes (mm): 550x750, 750x750, 980x830, 750x1050, 1000x1350, 1330x1080, 1600x1130
- 100% of display area visible for maximum flexibility
- Vandal resistant glazing and hinge mechanism
- Locking door
- Weatherproof construction

#### ADDITIONAL OPTIONS

- HardRok graphics panel (10 year anti-fade guarantee)
- Anti-tamper fixings
- Bolt-down or root-fix available
- LED illumination

#### Example shows

Panel: 680x1280

## MONOLITH

### LISBON 72008

- Digitally printed aluminium composite graphics panel in 316 grade brushed stainless steel frame.
- Standard size (mm): 564 x 2283 x 120
- 6mm low-ion toughened glass panel, reverse printed with full colour graphics
- Internal support frame with cross members and baseplate for mounting

#### ADDITIONAL OPTIONS

- Alternative sizes available

#### Example shows

Standard size

## CYCLE STAND

### COPENHAGEN A 72009

- Stainless steel tube 60mm diameter
- Standard size (mm): 940(w) x 860(h)

#### ADDITIONAL OPTIONS

- Available in galvanised, 316 stainless steel (for coastal or heavily salted roadway areas), or powder coated to standard RAL colour
- Bolt-down, root-fix or removable

#### Example shows

Standard size

## CYCLE STAND

### COPENHAGEN B 72010

- Stainless steel tube 50mm diameter
- Standard size (mm): 750(w) x 750(h)

#### ADDITIONAL OPTIONS

- Available in galvanised, 316 stainless steel (for coastal or heavily salted roadway areas), or powder coated to standard RAL colour
- Bolt-down, root-fix or removable

#### Example shows

Standard size

## CYCLE STAND

### COPENHAGEN C 72011

- Stainless steel tube 50mm diameter
- Standard size (mm): 730(w) x 800(h)

#### ADDITIONAL OPTIONS

- Available in galvanised, 316 stainless steel (for coastal or heavily salted roadway areas), or powder coated to standard RAL colour
- Bolt-down, root-fix or removable

#### Example shows

Standard size

## BOLLARD (FLAT TOP)

### MILAN A 72012

- Stainless steel
- Standard sizes (mm): 89x1200, 114x1200, 139x1200

#### ADDITIONAL OPTIONS

- Available in galvanised, 316 stainless steel (for coastal or heavily salted roadway areas), or powder coated to standard RAL colour
- Bolt-down, root-fix or removable
- Ground sockets available for removable posts

Example shows 114x930 (visible)

## BOLLARD (ANGLED TOP)

### MILAN B 72013

- Stainless steel
- Standard sizes (mm): 89x1200, 114x1200, 139x1200

#### ADDITIONAL OPTIONS

- Available in galvanised, 316 stainless steel (for coastal or heavily salted roadway areas), or powder coated to standard RAL colour
- Bolt-down, root-fix or removable
- Ground sockets available for removable posts

Example shows 114x930 (visible)

## BOLLARD (DOME TOP)

### MILAN C 72014

- Stainless steel

## BANNERS

### 94001

Banners are a low-cost effective way to promote and notify visits of important events. All our banners are weatherproof and fade resistant, printed on the highest quality material to ensure durability.

Banners are so versatile, they can be printed both sides, hung horizontally or vertically, and made in interesting shapes! Use them alongside permanent signage to create an eye-catching statement.
