MEET Q-RAILING'S NEWCOMERS

Here they are! The highlights of our new offerings for 2016-2017: the Juliet Balcony with additional lighting, a selection of new glass adapters and clamps, and an excellent addition to our Easy Glass® Hybrid range. And that's not all. We are proud to present 130 new products in our 2016-2017 product catalogue – each one meticulously designed, with plenty of great functionality. Check them out now!

EASY GLASS® JULIET BALCONY THE ENLIGHTENED BALCONY

INCORPORATE THE EASY GLASS® JULIET BALCONY INTO YOUR PROJECTS AND ENHANCE BOTH THE SAFETY AND APPEARANCE OF FAÇADES WITH FLOOR TO CEILING WINDOWS. THE FULLY TRANSPARENT GLASS STRUCTURE OF THIS JULIET BALCONY SYSTEM LETS MAXIMUM LIGHT INTO A ROOM AND MAKES FOR UNINTERRUPTED VIEWS.

The Juliet Balcony is a stylish addition to any façade. For an additional touch of elegance, you can add lights to the underside of the aluminium cap rail. Select your preferred colour tone to create just the right atmosphere, simply push the light units into place with a click.

- Creates a stunning effect
- Surface with stainless steel finish IX
- Dimmable white and coloured linear LED lighting
- Wall flanges and cap rails can be mounted both horizontally and vertically
- Easily installed

EASY GLASS® MOD 0749

TRUSTED DESIGN, IMPROVED FUNCTIONALITY

WALLS AND OTHER SURFACES ARE RARELY PERFECTLY STRAIGHT. WITH EASY GLASS® MOD 0749 THAT IS NO LONGER A PROBLEM!

Easy Glass MOD 0749 features built-in adjustability that makes it easy to position the glass panels in one straight line. Here is just one more way to design a custom balustrade that addresses the unique criteria and aesthetics of your project.

- For light to medium use
- Install on concrete with a chemical anchor or connect to a steel understructure with a bolt
- Facilitates easy levelling of glass panels on site
- Adjustment also possible throughout installation process
- Accommodates glass thicknesses of 8 – 25.52 mm

EASY GLASS® MOD 6400

DESIGNED TO MAKE A STATEMENT

- The same striking looks as our MOD 6000 glass clamp, but stronger
- Successfully tested for resistance to line loads up to 1,5 kN/m
- No need for holes in the glass infill thanks to clamping of panels
- Easily installed
- Accommodates glass thicknesses of 16.76 - 21.52 mm

EASY GLASS® HYBRID NOW ALSO FOR FASCIA MOUNT

EASY GLASS® HYBRID IS Q-RAILING'S LIGHTEST AND MOST ECONOMICAL GLASS RAILING SYSTEM. IT IS A "HYBRID" IN THE SENSE THAT YOU CAN MOUNT IT EITHER AS A GLASS BALUSTRADE OR AS A BALUSTER RAILING WITH A CONTINUOUS GLASS INFILL.

The system's strength comes from the ingenious design of both the cap rail and the thin base shoe. You can give it even more strength by reinforcing the glass balustrade with posts, which are surprisingly slim.

- For light to medium use
- For top, fascia and wall mount
- With ultra lightweight - only 43 mm high - aluminium base shoes
- Baluster-free up to 2.5 m, or with slender balusters for a longer balustrade
- Creates maximum transparency
