2017

brings a fresh leap forward for Woodberry. As a forward-looking family business passionate about seriously good quality outdoor furniture, we have continued to listen to our clients and develop our range to satisfy our commercial customers' needs.

Our new products this year include our Poolside Range (p28-31) and our Bistro Collection (p32-39), not to mention our eco-friendly Greendine Square 8-seater (p8).

Here at Woodberry, we take great care of the planet we live on. That's why many of our products are FSC® certified (FSC-C115839) – look for the FSC® logo. We're proud to be a UK manufacturer too, producing around half of our products here in Leamington Spa, and backed up by our ISO 9001:2008 qualification.

Lastly, but by no means least, our website now incorporates an online shop as well as helpful tools and advice to help make your outdoor space great. Browse today at:

tips & advice

Recommendations for using Woodberry furniture

All Woodberry outdoor furniture products are designed to withstand normal, reasonable social activity. Excessive misuse such as the following will render the product warranty void:

- Climbing or standing all over the furniture
- Cigarette burns
- Carving or hacking
- Vehicle impact or scuff marks
- Damage due to product being dragged over uneven surfaces
- Or any other activity deemed by Woodberry to be unreasonable

PLEASE NOTE YOUR GUARANTEE MAY BE AFFECTED IF YOU DO NOT USE YOUR FURNITURE IN LINE WITH THE ABOVE GUIDANCE.

Tips on storing Woodberry furniture

All Woodberry outdoor furniture products are designed to withstand being left outside all year round, with the exception of the following products:

- Parasols. Woodberry recommend that the customer always puts their parasols down at night and at any time when it is windy. Furthermore Woodberry recommends that the customer uses the weather cover provided when the parasols are kept down for 2-3 days or more. This will protect and enhance the life of your parasol. During prolonged periods of excessively cold or wet weather, it is a good idea to store your parasols under cover in a cool dry place. Do not store your parasol in warm or damp conditions as this could lead to growth of mould and mildew.
- Cushions. Whilst Woodberry employs up-to-date technology to ensure that our cushions are water-repellent, Woodberry's cushions are not water-proof. This means that if they are subject to prolonged wet conditions (more than just a light shower) then we recommend they are allowed to dry out in a warm environment overnight. Woodberry recommend that cushions are stored under cover in a cool dry place during prolonged periods of excessively cold or wet weather. This will protect and enhance the life of your cushions. Do not store your cushions in warm, damp conditions as this could lead to growth of mould and mildew.

If the customer chooses to provide additional storage in terms of a weather covers, then this will reduce natural fade and enhance the life of your outdoor furniture, although this is not strictly necessary.

If the customer chooses to bring their outdoor furniture inside or under cover for a prolonged period of more than 2-3 days, then Woodberry strongly recommends that it is kept in a cool and well ventilated area. Keeping outdoor furniture in warm or damp conditions could lead to growth of mould and mildew.

PLEASE NOTE YOUR GUARANTEE MAY BE AFFECTED IF YOU DO NOT STORE YOUR FURNITURE IN LINE WITH THE ABOVE GUIDANCE.

Cleaning and re-treatment for softwood furniture

In order to maintain the attractive condition of softwood furniture we recommend re-treating once a year with Woodberry Brown timber treatment. Woodberry's 5L Re-treatment kit includes all the necessary equipment to re-treat your softwood furniture, and this will cater for approximately 10 items of furniture.

This is best done in a bright, dry day. Ensure the table is clean from food or drink, using a soft rag and warm soapy water.

Preparation and treatment:-

- Scrub the surface clean using the scouring pad provided. Lichen or mildew may be removed using a stiff brush and a weak solution of warm water and vinegar.
- Smooth out any splinters or rough areas that have appeared with the sandpaper provided
- Sweep the area to be treated clean and dust free using hand brush provided
- Ensure this area is completely dry.
- Read the Health & Safety data sheet
- Using gloves and eye-protection provided, apply the treatment fluid once over with the rag, rubbing in well, along the same direction as the grain. Ensure no residual fluid remains in deep grain.
- Allow 48 hours to thoroughly dry. When dry, the furniture is safe to be used as before.

Application of any treatment, lacquer or varnish other than Woodberry Brown will render your warranty void

Cleaning for Rattan furniture

In order to maintain the attractive condition of rattan furniture we recommend cleaning once a year.

- Rinse your furniture with warm water and a non-foaming cleaner using a soft rag or sponge.
- It is important to use a non-foaming cleaner on rattan furniture, as a foaming product will leave residue in the gaps in between the weave which will then attract dirt
- Brush the furniture clean using a hand brush or soft scrubbing pad.
- Finally, rinse the furniture off well with clean water using a garden hose and a spray attachment. Ensure the hose is on a wide spray at a distance of approx. 1m.

Cleaning for teak furniture

In order to maintain the attractive condition of teak furniture we recommend cleaning once a year.

- Choose a warm, sunny day.
- Rinse your furniture with a garden hose to release debris and dirt. Not a high pressure one as this may raise the grain of the wood and cause surface erosion.
- Take 1 Gallon of water, a quarter cup of bleach and two thirds of a cup of light laundry detergent. Then, with a stiff hand-brush remove mildew and staining using the brush in smooth strokes along the direction of the grain.
- Take the hose again and rinse the furniture thoroughly – making sure to leave no detergent on the wood. Then leave in the sun to dry.
- We strongly suggest keeping your outdoor furniture in a place where it will benefit from regular, direct sunlight as this will naturally kill mould and mildew growth.
- If you do not want the mellow, weathered, grey appearance of ageing Teak, then use a Teak Protector – this will enhance the cosmetic appearance of the teak far better than any oil ever will. This process must be repeated annually

Cleaning for plastic, recycled plastic or metal furniture

- Firstly apply warm soapy water using a soft rag or sponge to clean away loose dirt.
- Brush the furniture clean using a hand brush or soft scrubbing pad.
- Rinse the furniture well with clean water, using a pressure hose if required.
- If stains are not removable using this method then a mild cleaning agent may be used in place of soapy water.
- Please note that recycled plastic material does have a mottled finish. This is normal and cannot be removed.
