

Security Barriers

We offer a range of options when it comes to securing your premises against unwanted visitors or to manage site traffic.

You can choose from the Security block, the Jersey barrier, the V-interlocking concrete block or from our Interlocking block range.

All systems come with integral lifting options and can be painted in your company logo/colours, Ministry of Transport approved chevrons, etc... and provide a much cheaper alternative when compared to hiring-in barriers.

Security Barriers

Block types

Our large two tonne precast concrete blocks are designed and manufactured to be used as security blocks preventing access to land and buildings and are ideal for blocking entrances and gateways.

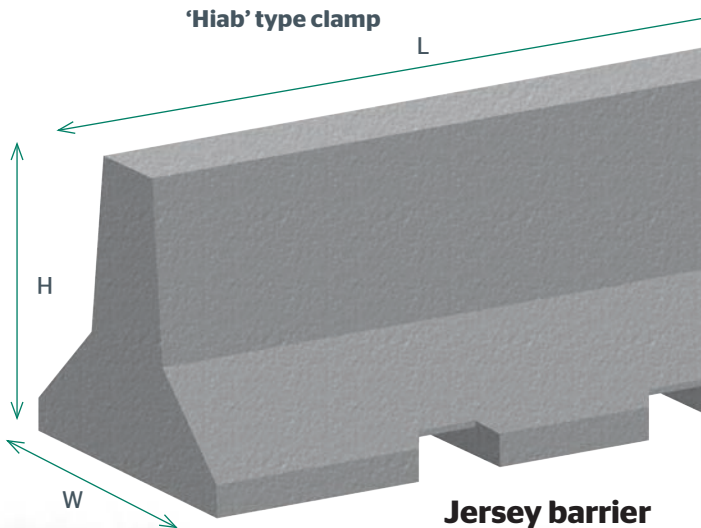

However, where perimeter security is required e.g. around car parks and large open spaces, our Jersey barriers are the perfect solution. At 2500mm L and weighing 1450kgs, the Jersey barriers are the perfect deterrent for un-wanted visitor's vehicles. They also make ideal edge protection preventing vehicles from overturning into any deep ditches etc that may run alongside your roadways.

All of the blocks have their own lifting and placing systems and can be delivered and installed by our specialist team using the...

Forklift/Telehandler slots

'Deha' lifting pin

'Hiab' type clamp

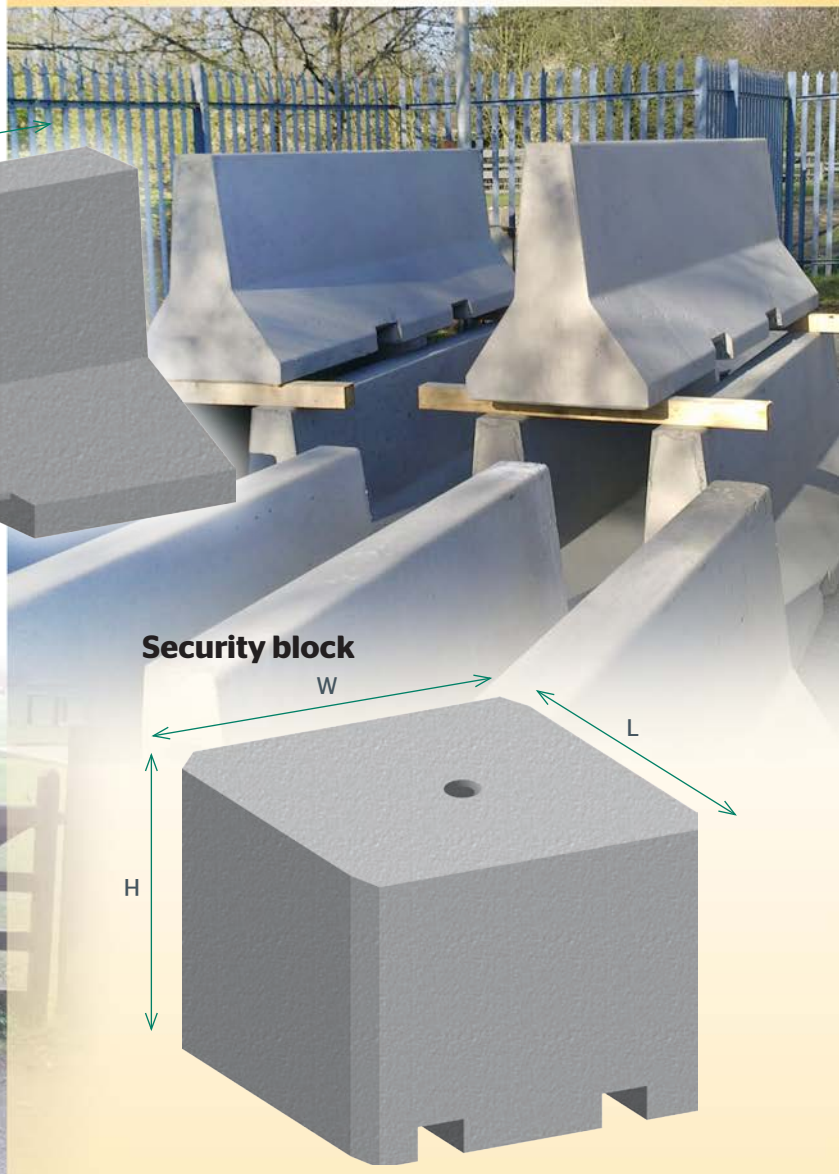

Jersey barrier

Security barriers

Type	Length	Width	Height	Weight
Security	990mm	1225mm	770mm	2000kg
Jersey	2500mm	610mm	810mm	1450kg
V-block	1830mm	610mm	610mm	1600kg

As lighter weight alternatives our Interlocking and V-blocks can also be used as security barriers – please refer to their respective product pages, p11 for Interlocking blocks and p13 for V-blocks.
