

Legato™ Interlocking Concrete Blocks

Class A1 fire resistant in accordance with clause 4.3.4.4 of EN 13369.

Elite are proud to present the ultimate interlocking block - Legato™, the name coming from the Italian for 'tied together'.

Elite are the only company in Europe to manufacture interlocking blocks using high strength (50N/mm²) concrete. This allows our Legato blocks to exhibit extreme levels of durability, combined with the flexibility of having their own cast-in lifting pin. As each standard block will build 1.28m² of wall, they provide an incredibly quick solution in a wide variety of applications.

These include...

Support walls for roof structures

Cofferdams

Bay walls

Push Walls

Silage clamps

Grain storage

Earth retention

Etc etc...

In addition, because the blocks do not contain anything other than high quality, locally sourced aggregates and Portland Cement, you can be assured that your investment will last a lifetime.

See reverse for the full range and specifications.

Legato™ Interlocking Concrete Blocks

Legato™ interlocking block range

Our Legato™ blocks come in various sizes - including flat top versions - the standard block is an **LG8 1600mm x 800mm x 800mm** (highlighted in the table opposite) and weighs in at 2400 kgs.

As each Legato™ block has its own lifting pin cast into it - you can easily change the way in which they are configured without the need for specialist lifting equipment or grabs.

Durability, strength and availability are the key features of these blocks and a next-day nationwide service means that you are never more than 24 hours away from taking delivery.

Legato™ Block Code	L x W x H mm	Weight
LG1	400 x 800 x 800	590kg
