CLADDING TO EXTERNAL BUILDING TO MATCH SCHEME

Project Name:
University Of Hertfordshire
Hatfield, Hertfordshire

Architect:
Willmore Iles

Contract Value:
£570,000

Contractor:
Bouygues Construction
Franck Girard (Project Manager)

Landscape Architect:
The Landmark Practice

Job Type:
Supply & Install

This major student accommodation project undertaken by global contractor Bouygues, in Hertfordshire, had a requirement for a wide range of street furniture.

The contractor and design team engaged with Langley Design at early stage to design and develop the university's external furniture needs. Our experience, flexible manufacturing and consultative approach enabled a cost effective solution to be achieved, while still maintaining the full specification of street furniture and high quality standards of product and installation.

Over the last two years, alongside the general street furniture products, we supplied and installed, a wide range of striking cycle shelter and bin store combination units to compliment the strong design features of this stunning university scheme.
