Torsion Group
Ben Cohen (Technical Manager)
Chris Goodall (Construction Director)

Job Type:
Supply and Install

COURTYARD BENCHING (SBN321)

Specialist contractor Torsion Group and Fabrik Landscape Architects had to provide a compact external facility in a tight courtyard space. We were asked to provide a street furniture and cycle storage solution to match this high quality student accommodation project in Birmingham. Collaborating with both parties we managed to achieve the required amount of secure covered cycle parking needed to satisfy planning and link it with the benching and picnic tables for the attractive outdoor area. The plinth mounted benches have a slight curve to follow the flow of the walkway and help enhanced the visual impact of the area.
