Colin Mitchell (Site Manager)

Architect:
Willmore Iles Architects
The Landmark Practice, Bristol

This new student accommodation development provided an enhancement to the existing student experience by shaping the built forms into two accommodation clusters, reinforcing a collegiate environment and fostering a sense of community. The student accommodation hub required large secure cycle storage structures, enclosed bin stores and external furniture elements to enhance the landscaping linking these buildings. The shelters were designed specifically to compliment the accommodation units, utilising steel roofing and gutters powder coated to match the buildings accent colour. Hardwearing concrete benching lines the walkways of the social areas and Langley table and bench sets give an external work/dining space to complete the scheme.
