Contractor:
Kier

Architect:
Frank Shaw Associates Limited

Histon and Impington Junior School is a recently expanded school in Cambridge that required multiple steel covered walkways and canopies to link the old buildings with the new. Langley Design worked with Kier to come up with a solution that would not only be visually appealing but make the existing outdoor courtyard areas more inviting. Along with the canopies we also provided recycled plastic benching and different shaped planter bench combination units for the children to enjoy on break times.
