

Green Park Village is a new development offering a stunning collection of New England inspired houses and apartments, minutes away from central Reading. Langley Design worked with Berkeley Group to design a 15m x 4.8m timber pergola structure that would provide shelter and act as a social seating area in the courtyard for the residents. We adapted our standard SPG300 pergola to meet the specific size requirements and our SBN307 curved bench fits perfectly to the sites curved landscaping.
