

SHELDON SEDUM ROOF CYCLE SHELTER - SCS304

MALFORD TWO TIER RACKS - MCR205

SCS304

Agar Grove is a new housing development located in Camden, London and will provide over 400 affordable homes for new and existing tenants. Langley Design were delighted to work with Hill Partnerships for the first time to provide cycle parking facilities for the residents. We adapted one of our more standard sedum roofed designs to produce a new cycle shelter that enabled our two tier racks (manufactured by Langley Design in the UK) to be stored underneath in order to optimise the use of space and to accommodate as many bicycles as possible.
