

SHELDON SEDUM ROOF CYCLE SHELTER - SCS319

SHELDON SEDUM ROOF CYCLE SHELTER - SCS319

Nightingale Primary School is a new high quality school and nursery located in the Tiger Way development in Hackney. This mixed-use development creates an excellent learning environment combined with high-quality residential apartments. This school has recently been shortlisted for a BREEAM Award in the public sector category.

Langley Design were commissioned to manufacture and install secure cycle parking for the project. As a bespoke manufacturer, we tailored our Sheldon sedum roofed structure in order to incorporate a covered walkway and entrance canopy to the front of the school. The green powder-coated finish used on the cycle shelters was chosen to match the schools colour scheme.

Our flexible approach to working with all interested parties involved in the design process, enables us to offer unique street furniture solutions for all sectors and project sizes across the UK.
