

Langley Design are always happy to work with new contractors and when W Stirland asked us to look at the bin and bike store combination unit for the Kilnmead Housing Development, we knew we would be adding them to our ever growing customer list. Langley Design are the leading provider of timber combination units in the UK and have earned a reputation by providing the highest design quality which simply can't be rivalled for these type of enclosures. Working closely with the architect, we produced a bespoke, fully secured cycle and bin storage facility for the residents. The project involved the construction of 37 units of affordable housing on the site of a former car park in the centre of Crawley and Langley Design were approached due to our bespoke and flexible manufacturing capabilities.
