ARCHITECT: NORR CONSULTANTS LTD

LANGLEY DESIGN
EXTERNAL FURNITURE SOLUTIONS

Elliott Building & Civil Engineering contacted Langley Design to see if we could install one of our most popular cycle parking products on their Holiday Inn Bicester Project. Langley Design have built up an enviable reputation as the leading timber cycle store manufacturer in the UK and the SCS310 was chosen by the client due to its superior build quality compared with other products on the market. In this case the cycle shelter can accommodate up to 26 bikes and sits at the back of the hotel for guests and staff to use. As a bespoke manufacturer, Langley Design were also able to support Elliot by making the various different screening products required on site. Our bespoke manufacturing capabilities enabled us to offer the project substation screens and bin store walling. By using the same timber across all of our products the landscaped areas look fantastic as the aesthetics flows across the design. We also finished the project by making the benches and bins.
