Langley Design were delighted to showcase our more creative side on the Sky Pavilion project delivered by ISG. Working with Duffy Construction and using our bespoke design capabilities we manufactured and installed a stunning curved timber bench top affixed to the pre-cast concrete below. Made from hardwood Cumaru with a rounded front edge and drip groove, the timber acts to soften the look of the concrete and provides a contrast between the landscape materials whilst forming a relaxing aesthetic, offering all employees and visitors a chance to enjoy the great outdoors with somewhere comfortable to sit, dine and socialise. Specialists in both street furniture and external structures Langley Design were also able to produce 70m worth of timber screening utilising our popular and cost effective Sheldon range, manufactured in structural grade European Redwood this closed off access and protected the sites plant equipment.
