

CASE STUDY

TVS ABSorb Wall Panels

9th Heywood Scout Group

PROJECT INFORMATION

Project Objective

TVS Group were approached by 9th Heywood Scout Group, they had a new hall built but were finding it unusable for large groups of people to the high levels of echo they were experiencing.

TVS supplied and fitted 21 of our TVS ABSorb Wall Panels to the clients satisfaction, his comments after the works:

"Many thanks for completing the installation last Thursday. The design, fitting and attention to detail in meeting our requirements has all been excellent and on behalf of the Scout Group, please accept my thanks for a very professional job well done."

"I mentioned at the time of installation the notable difference made by the panels. They have actually transformed the room, making it not only quieter but creating a warmer, more relaxed environment. Last night we had our first meeting in the HQ with around 20+ children. The Leader in charge reported a much improved experience, so I'm delighted it passed the acid test!"

"Thanks again for resolving this issue for us."

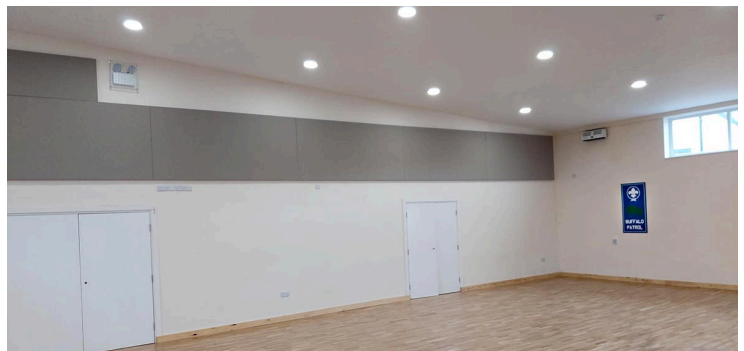

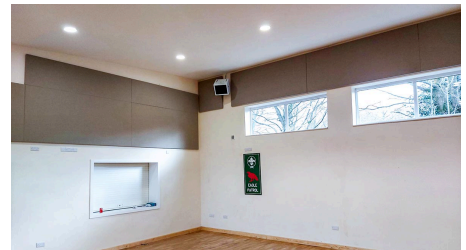

Richard Baron – 9th Heywood Scout Group

Product

TVS ABSorb Wall Panel – various sizes

Special Features

Class A absorber
40mm thick material
Impact resistant
Cost effective
