## Specialist Fabrication Services

At the head office in Lisburn, there are two fully equipped workshops for mild steel and stainless steel/aluminium fabrication. As well as our specialist work in the retail industry, we have extensive experience of providing engineering solutions to both commercial and domestic construction sectors. We are happy to quote for general fabrication in both aluminium, mild & stainless steel, timber and composite materials. Utilise our 3D design capability, and let us bring to bear on your job our many years of experience in realising many innovative designs. We can bring a "can do" attitude that can make all the difference between the good and the adequate. But all successful projects have a careful combination of the skill of the designer with the skill of the fabricator. We are always happy to discuss preliminary designs and help you get the best out of your idea.

## Installation Services

To guarantee consistent customer service levels we manage the delivery and installation process with in-house trained personnel including contract management, health & safety management and skilled site engineers.

We are proud of our highly trained staff who, across all disciplines, are able to respond to your requirements. Our sole objective is to carry out your requests, on time, to the required specification and within an agreed budget.

Our vehicles are equipped to carry out all types of work and our engineers carry a range of equipment to ensure that they are capable of resolving the unexpected.

# Company Profile

Rocklyn Engineering Ltd is one of Ireland's leading manufacturers of a wide range of shelters, trolley parks, covered walkways, canopies, balconies, street furniture, handrail & balustrade and retail equipment.

Established in 1980, Rocklyn Engineering is a family owned business that specialises in products and services for the Irish retail trade. From our locations in Lisburn and Kildare we offer customers a range of standard and custom products that we both manufacture ourselves and source from some of the world's most reputable suppliers of retail equipment.

Rocklyn Engineering Ltd have over 20 years experience in the manufacture and installation of Bus Shelters, Platform Shelters, Waiting Shelters, Cycle Shelters, Pay Station Canopies, Covered Walkways, Handrail & balustrade, Height Restrictor Barriers, and a wide variety of other products, to Building contractors, Shopping centres, Major supermarket groups, Airport, Railway and Bus Authorities throughout Ireland and the UK.

The company operates an accredited Integrated Management System which covers the requirements of ISO9001:2010, OHSAS 18001:2010

# Trolley Sales, Logistics and Distribution

Rocklyn offer a logistics/transport service for supermarket trolleys and other equipment. We have a fleet of transport vehicles including a 40 foot 2 tier vehicle with double deck taillift to ensure trolley distribution is carried out in accordance with all health & safety regulations. We also offer consultation on how best to manage your entire trolley fleet to maximise the longevity of your investment.

Rocklyn offer an all inclusive package which can include retrieval from car park and surrounding areas, maintenance and cleaning. Packages can be tailor made to suit the retailers needs and we will work with you to protect your investment and reduce retrieval costs, litter fines and losses whilst ensuring your customer is met with a clean and functional trolley upon visiting your store. Rocklyn currently operate in 8 of the largest shopping centres in Ireland.

Rocklyn started in business in 1980 as a trolley maintenance business and have been operating in this field for almost 30 years. We have designated vehicles kitted out with all the necessary equipment to service and repair your trolleys on site ensuring minimal disruption to the day to day running of your store. We stock all the necessary parts from locks to plastics and recognise manufacturers warranties to further reduce your ongoing maintenance costs. Packages can be structured as periodical preventative maintenance required by health and safety regulations or as a breakdown service on a call out basis or even all inclusive trolley maintenance and cleaning contracts.
