Some things cannot be rushed and like many of our products the Osso is one of them . The forming of the seat is a very highly skilled and time consuming process. The profile is achieved by forming incremental bends every 3mm.

## Our Story

Factory Furniture was established in 1989. Our earliest projects were one-off bespoke interior pieces until in 1991, with Crafts Council recognition, we launched the Serpentine bench at the New York ICFE.

And that's where it all started, the demand for the Serpentine seat concentrated our attention and we soon became exterior furniture specialists. We constantly refine our furniture and the paring down of our designs led to the mantra we follow to this day - 'simplicity of form and honesty of material' .

Today, we draw on our pragmatic approach to produce products of consistent high quality and with rigorous attention to detail. Our public furniture is still hand-made by our experienced, design and manufacturing team, selecting the best materials for each product.

After 30 years of experience Factory Furniture has the necessary insight into the challenging demands of public spaces and the needs of the people who use them. This makes us a valuable partner for all kinds of projects, no matter how big or small.

Our furniture is designed to endure and appeal - just as when we first created the Serpentine seat. We design and make street furniture and we enjoy it!

## EXPORT

At Factory Furniture we feel very fortunate that our success has seen us export our products all over the world. We are constantly seeking to develop new markets overseas.

Following increasing demand for our street furniture abroad, we have created a network of agents in Europe and the USA. This makes purchasing our products even easier for our overseas clients.

**[export@factoryfurniture.co.uk](mailto:export@factoryfurniture.co.uk)**

## TIMBER PURCHASING POLICY

All timber stocks currently bought for Factory Furniture products come from FSC® certified forests. They are covered by a valid Chain of Custody (CoC) certificate.

We've been sourcing tropical hardwoods from FSC® stocks for our products since 1998. In 2008 we made the decision, going forward, to source all our timber that way and for the last 10 years we have sourced all of our timber from FSC® 100% stocks.

Products carrying the FSC® label are independently certified. This assures consumers that they come from forests managed to meet the social, economic and ecological needs of present and future generations. FSC® certification ensures that the forest of origin has been independently inspected and evaluated. This evaluation is according to strict environmental, social and economic principles and criteria as agreed by the Forest Stewardship Council®.

Forest management can damage or benefit both the environment and society. This policy recognises and accepts our responsibility as a consumer of forest products, to ensure that our impact on the world's forests is either neutral or positive.

*For further information about the Forest Stewardship Council visit [www.FSC-uk.org](http://www.FSC-uk.org)*

*Our FSC License Code is: FSC-C005669 and our FSC certificate number is: CU-COC-806405.*

## WASTE MANAGEMENT

Factory Furniture recognises the importance of managing and minimizing waste. This ethos begins with the ordering process – by ordering project specific sizes with a minimum of waste. This is then followed through to the workshop where we carefully select the most appropriate pieces of timber for each product.

All solid wood waste produced by Factory Furniture is used to provide carbon neutral solid fuel for domestic use. Particle or dust waste is collected for recycling. Compostable materials are recycled at local green waste facilities.

Factory Furniture uses a minimum of plastic based packaging, preferring to use cardboard made from 100% post consumer waste. Metal waste is a precious resource, and therefore also recycled locally.

## CONCRETE BLOC

THE CONCRETE BLOC is a heavy duty bench in exposed aggregate concrete. Its clean, simple lines and variety of available finishes make it a very versatile product. It can be lifted into any position and thanks to its weight, it can be left without fixing and also serve as a vehicle deterrent. The concrete Bloc bench can easily be combined with the concrete Bloc table to create an outdoor dining set.

## WOOD BLOC

THE WOOD BLOC is a very heavy-duty wooden street seat in generously proportioned FSC® certified timber. The slats are suspended above the surface level on a stainless steel frame to prevent ground level rot and enable easy part replacement. The back and armrest frame is also in stainless steel whilst the backrest is FSC® timber. The wood bloc benches can also be combined with tables to create an inviting outdoor dining set.

## BOORT

BOORT's contemporary design, clean lines and sturdy construction make it ideal for use in both indoor and outdoor environments. The ribbed construction of these street benches is both comfortable and maintenance free whilst displaying the natural beauty of the FSC® timber slats to full effect. The Boort seat can be supplied with or without armrests.

## CAMDEN

THE CAMDEN BENCH evolved from designs developed for Camden Borough Council. This bench is designed with contemporary street seating needs in mind, including resisting criminal and anti-social behavior:

Deters bag theft, littering; and is self-cleaning and easy to relocate.

Anti-Hostile Vehicle Mitigation PAS 68 CPNI approved version available.

The bench is made from concrete and comes in a variety of available finishes

## CHRONOS

CHRONOS is a modular bench system of straight and curved bench sections which can be combined to create tailored layouts to fit any scheme. The 51cm wide bench provides generous seating width and the simple but elegant base design allows for surface or sub-surface fixing. The stainless steel frame is designed to provide easy access for slat replacement in the unlikely event that damage occurs. The three different modules are the 90°, the 69° and the straight module with bespoke versions also available.

## OSSO

THE OSSO is part of a newly designed range of public furniture. The range is inspired by the inner structure of bone, as its name suggests, and the complex organic patterns are created using a Voronoi algorithm. At nearly 4 metres long it is clearly a statement piece and the organic bench sits perfectly in street and town locations as well as shopping and airport malls.

### Key benefits

- Weight reduction of the structure
- Ability to see any concealed baggage for security conscious public spaces
- Free draining seat area
- Can be coated with any nylon wear resistant colour

### Dimensions

<i>Metric</i>	<i>Imperial</i>
length 3950mm	length 12' 11½"
width 700mm	width 2' 3½"
height 470mm	height 1' 6½"

## OSSO<sup>2</sup>

THE OSSO<sup>2</sup> is a new addition to this range of public furniture. The range was inspired by the inner structure of bone, and the patterns are created using a Voronoi algorithm. At 2.3 metres long this organic bench sits perfectly in street and town locations as well as shopping and airport malls.

### Key benefits

Weight reduction of the structure

Ability to see any concealed baggage for security conscious public spaces

Free draining seat area

Can be coated with any nylon wear resistant colour

### Dimensions

*Metric*  
length 2300mm  
width 500mm  
height 470mm

*Imperial*  
length 7' 6"  
width 1' 8"  
height 1' 6½"

## OSSO<sup>3</sup>

OSSO<sup>3</sup> is part of a newly designed range of public furniture. The range was inspired by bone composition and the complex organic pattern was achieved using a Voronoi algorithm. Complementing the Osso Bench, the Osso<sup>3</sup> is intended to be used as a dramatic stand-alone bench or multiples arranged to provide more social spaces. This statement piece sits perfectly in street and town locations as well as shopping and airport malls.

### Key benefits

- Weight reduction of the structure
- Can be linked if required
- Ability to see any concealed baggage for security conscious public spaces
- Free draining seat area
- Can be coated with any nylon wear resistant colour
- Can be dismantled into three parts for easier transport and installation for indoor locations

### Dimensions

<i>Metric</i>	<i>Imperial</i>
length 2720mm	length 8' 11"
width 2385mm	width 7' 10"
height 470mm	height 1' 6½"

## PIK

THE PIK is a new take on the classic park seat. Designed with strength and durability in mind using sturdy FSC® registered: tanalised timbers and a hot dipped galvanised steel frame. It offers a large seating capacity (up to 6 people). The length can be adjusted using our in-house bespoke design service

### Dimensions

*Metric*  
length 3000mm  
width 610mm  
height 897mm

*Imperial*  
length 9' 10"  
width 2'  
height 2' 9"

## PIK PICNIC

THE PIK PICNIC TABLE is a new take on the classic picnic table. Designed with strength and durability in mind using sturdy FSC® tanalised timbers and a hot dipped galvanised steel frame which can also be coated if required. It offers a large seating capacity (up to 10 people). The open design allows for ease of access and clear leg space. The ends of the table are accessible for wheelchair users. If desired the table length can be adjusted using our in-house bespoke design service

### Dimensions

*Metric*  
length 3000mm  
width 1480mm  
height 735mm

*Imperial*  
length 9' 10"  
width 4' 10½"  
height 2' 5"

## RIBBON

THE RIBBON 'TWIST' and 'FLAT' feature a slat design cleverly mounted onto a galvanised steel frame allowing for easy replacement. The design of the 'TWIST' version naturally deters skaters and provides minimal surface area for tagging whilst also providing different seat heights. This sculptural wood bench is both comfortable and robust and is designed to enhance any contemporary street scene.

## SCROLL

The distinctive scrolled edge of the Scroll and its timeless design lends itself to both historically sensitive and contemporary settings. The bench features timber bench and backrest slats mounted onto a concealed stainless steel frame to allow for quick slat replacement. The high quality of materials used for this bench make it extremely robust and suitable for a range of environments. The Scroll bench is available as a seat and can also be supplied with armrests

# SERPENTINE

THE SERPENTINE SEAT is designed for use in any public space. The undulating seat slats provide a free draining and comfortable yet exceptionally strong street bench intended for the most extreme environments. The design of the seat naturally deters skaters and provides minimal surface area for tagging. Constructed from standardised, easily replaceable parts, this unique wood bench is available in two base options, the original elliptical granite or tubular stainless steel.

## Feature sites

## SINU

THE SINU BENCH is a modular bench system with varying curved and straight wooden bench sections, which can be combined to produce uniquely tailored street layouts. The three modules (90°, 72° and straight) are comprised of profiled FSC® hardwood slats supported on a galvanised steel frame to allow for easy slat replacement and then supported on stainless steel bases. At 60cm wide, it provides generous seating width while the minimalist base design allows the free form of the bench to float above ground level.

## CONCRETE SOCA

THE CONCRETE SOCA BENCH offers space defining, free draining and comfortable seating all year round. It features profiled FSC® timber slats suspended over a solid concrete base. The street bench's design lends itself to situations where an attractive vehicle deterrent is required or if a simple place and site solution is required. The concrete base can come in a variety of finishes (including limestone and granite) and, as for all our products, a bespoke service is available to create almost any configuration. The concrete Soca seat comes with a timber slatted back rest and stainless steel armrest at one end which also acts an anti skate deterrent.

## STEEL SOCA

THE STEEL SOCA SEAT is an adaptation of its heavier cousin, the concrete Soca seat. The seat features profiled FSC® timber slats mounted on two heavy duty galvanised steel bases. It offers space defining, free draining and comfortable seating all year round. We can manufacture this seat to a variety of lengths and configuration. The steel Soca seat comes with a timber slatted backrest and stainless steel armrest at one end which also deters skaters.

## TORD

Intended for the heaviest town centre use, the TORD Table and bench has a simple yet attractive contemporary design which is suitable for a variety of urban uses. It is free draining, extremely robust and easy to maintain featuring profiled FSC® timber slats mounted on two galvanised or stainless steel bases. The Tord table in combination with the Tord benches, can be used to create an inviting outdoor dining set suitable for the heaviest use.

## ACCESS TREE BENCH

THE ACCESS TREE BENCH is designed to provide seating around a tree, column or other central feature. As its name suggests, the bench does not fully enclose the tree. Its two halves are separated by a gap which not only allows access into the central area, but also provides space for wheelchair users. This tree seat is designed to withstand the heaviest town centre treatment and features an incredibly strong all-welded deep stainless steel frame and easily replaceable FSC® timber slats.

## UTIL

The visual lightness of UTIL belies its robust design. The wooden bench features a gently sloping backrest and a frame constructed from a heavy gauge stainless steel box section with an all-welded construction. The FSC® timber slats are designed to be easily replaceable should damage occur. Tabs on the legs allow the Util seat to be securely fixed to the ground. The Util seat can be supplied with or without armrests.

## UTIL WALL

The visual lightness of the UTIL belies its robust design. It features a gently sloping backrest and a frame constructed from a heavy gauge stainless steel box section with an all-welded construction. The FSC® timber slats are designed to be easily replaceable should damage occur. All the products in the Util wall range of street furniture are designed to fix onto the top of any suitable dwarf wall or plinth and can quickly be removed for maintenance while leaving the fixing brackets behind for easy reinstallation. The Util wall seat can be supplied with or without armrests.

Products | Tree Guards

## THE SKOP TREE GUARD AND GRILLE

THE SKOP TREE GUARD AND GRILLE is designed to provide street protection and support for feature trees. It complements the Skop range of urban landscape furniture, but it also looks great in combination with any of our other seating products. The sturdy stainless steel box frame can be removed from the galvanized grille if required and the whole unit comes in two halves for easy installation

Products | Bins

## WOOD BLOC BIN

THE WOOD BLOC LITTER BIN shares its rugged, no fuss design with the rest of the Bloc range, and comes with all the features that are required in today'S demanding street environment. It features FSC® timber slats with a stainless or galvanised, powder coated mild steel body. The front panel, which is secured with a standard 8mm tri-drive slam lock, swings open for easy access to a removable galvanised steel bin liner. There is also a separate, easy-to-empty cigarette bin mounted on the door.

### Feature sites

Colmore Square, Birmingham

*Capacity*  
80 ltrs

## BOORT LITTER BIN

THE BOORT LITTER BIN has an understated appeal born from the simplicity of its contemporary design and the beauty of the timber and stainless steel from which it is made. It complements our Boort seating range of architectural street furniture, but will also combine very well with our other seating products.

It has FSC® hardwood slats, a sturdy galvanised frame and a hinged stainless steel lid which lifts up to allow access to the removable galvanised steel bin liner inside.

## THE OSSO LITTER BIN

THE OSSO LITTER BIN is part of a newly designed range of public furniture and complements the Osso as well as the Osso 2 and Osso<sup>3</sup> benches. The range is inspired by the inner structure of bone, as its name suggests, and the complex organic patterns are created using a Voronoi algorithm.

This statement piece sits perfectly in street and town locations as well as shopping and airport malls.

### Key benefits

Stainless steel non marking top with integrated cigarette stub plate

Cigarettes are disposed of in the usual litter

Non-locking top avoiding any maintenance problems

Can be coated with any nylon wear resistant colour

Products | Planters

## TREE PLANTERS

Our TREE PLANTERS are built to last and feature a box section sub frame and galvanised steel liner enabling the planter to be lifted even when full – an essential feature when planting in the street. The planters are clad in FSC® hardwood timber panels which are suspended on a frame and allow free air circulation around the timber to prevent rot and also allows for replacement should damage occur. The top of the planters are finished with a stainless steel rim. The base frames feature forklift channels

## Projects

## 'REVEAL/CONCEAL', BBC HOMEFRONT

**Client**

Diarmuid Gavin

Factory Furniture were approached by Diarmuid Gavin and the BBC to produce a feature structure for the popular makeover series 'Home Front in the Garden'. 'Reveal/Conceal' is a large cedar-clad garden structure with walls that can be gently lowered by hand with the aid of concealed springs. Once lowered, these walls become useable decks leaving an inner 'skin' of sliding doors made with stainless steel fabric panels.

## GLOBE CHAIR - CHELSEA FLOWER SHOW

Factory Furniture were approached by Diarmuid Gavin to produce a piece of feature furniture (Globe chair) for the designers entry in the 2004 Chelsea Flower Show. The brief was to create an exterior version of the original 'bubble chair' by Eero Aarnio. Our Globe chair design is fabricated from stainless steel with a wire 'seat' and tube rim all suspended on a central chain.

Client

Diarmuid Gavin

## SURF SEAT

We created the Surf seat after being asked to design some seating for the new Spinningfields development in Manchester. Our creation featured an FSC® Cumaru hardwood 'board' and a satin finish stainless steel base. In order to increase its night-time impact the seat featured LED strip down lighting which was mounted into channels around the base. The Surf seat design was so popular that it went on to be used on Hardman Boulevard, Manchester, and then 707 Westchester Plains, New York and Kuwait University

## TOWER 42, BISHOPSGATE

Factory Furniture were asked to create two feature seats for the iconic Tower 42, Bishopsgate. We were pleased to accept the challenge of making HED's ambitious seating concept a reality. Each seat reached over 3m in height and required a design that could cope with the changing levels of the site and the curving wall onto which they sat. The sweeping FSC timber seat slats and armrests were carried by a modular steel frame. The seats were broken into sections that were assembled in the workshop before being transported to site ready for installation. Each seat

was fitted with integrated top-down lighting which dramatically illuminates them during night-time hours.

**Client** Hyland Edgar Driver & The Family Office

## BROAD STREET, READING

For its pedestrianised shopping area on Broad Street, Reading Borough Council wanted feature seating that would deter skaters. To fulfil the brief, we designed benches in rough punched Cornish granite with polished tops and inset timber elements in FSC® certified hardwood with stainless steel arms and anti skate studs.

**Client**

Reading Borough Council /  
Moore Piet & Brookes

## GRACECHURCH STREET, LONDON

Charles Funke Associates asked Factory Furniture to provide seating on the Gracechurch Street site in London. As requested, we designed and built bespoke cantilevered benches to surround the large granite air vents which are located in this public courtyard. The benches were made from FSC® hardwood with a stainless steel frame.

Client

Charles Funke Associates

## GREAT QUEEN STREET, CAMDEN

City centre benches can be magnets for anti-social behaviour and criminal activity. And due to residents' complaints, in some central London areas much of the street seating has been removed. To address these problems, Camden Borough Council commissioned Factory Furniture in 2010 to design a new range of public furniture for Great Queen Street.

To ensure that our design would meet and overcome a wide variety of urban challenges, we drew on a wealth of expertise

from various departments including Transport Planning, Highways Engineers, DDA officers and the Met police's 'Crime Prevention Design Advisor'. This was necessary to allow Camden officers to reintroduce seating to the borough, hoping to encourage walking, enhance the quality of the public realm and enable people to sit and enjoy public spaces and streets again.

**Client**

Camden Borough Council

**Awards**

Keep Britain Tidy best practice, Design Council / Home Office approved to design out crime, Home Office approved for counter-terrorism use as a vehicle blocker.

## CATHEDRAL SQUARE, PETERBOROUGH

Factory Furniture, in association with LDA Design, created several pieces of unique urban furniture for Cathedral Square in Peterborough. The impressive feature seating drew inspiration from the architecture of the nearby cathedral. In keeping with the historic nature of the site we used traditional joinery techniques now rarely seen in street furniture. The seating was manufactured from FSC® hardwood with stainless steel elements. The project demonstrated the commitments to quality and attention to detail that are the trademarks of Factory

Furniture's work.

The Cathedral Square brief called for double and single-sided formats. The double-sided benches stood on their own, while the single-sided benches were linked together in a chain. They were designed to be hardwearing and removable without having to lift surrounding paving.

**Client**

Peterborough City Council

## CANAL WALK, SWINDON

Factory Furniture were asked to design some heavy duty curved seating for Canal Walk (part of the pedestrianised area of Swindon's town centre). The timber bench slats and backrests were manufactured from FSC® hardwood. The frame, armrests and bases were fabricated from stainless steel with a satin polished finish. The design also incorporated anti-skating features and integrated under-seat lighting. A socket-type foundation was specially developed for the Canal Walk project. This enabled removal of the seats for maintenance

without disturbing the paved surface. It was also important as it allowed, where necessary, for on-site levelling adjustments. The legs housed the electrics for the lighting system which could be accessed, when needed, via a secure panel.

**Client**

Swindon Borough Council

## WINCHESTER

Factory Furniture were approached to create a range of benches for the high street in Winchester. They were manufactured from FSC® Oak timber and powder coated stainless steel. Among the seating's distinctive design features were two removable end panels which could be replaced with glass plates, decorated by local artists, at a future date. The benches and seats (with back and arm rests) incorporated a specially designed shallow mount anchor system to minimise the disturbance to street services and also allowed for removal of the seat, if necessary, without

the destructive removal of paving. The base design also allowed for height adjustment on site for levelling purposes due to the steeply sloping high street.

**Client**

Hampshire County Council

## LETCWORTH GARDEN CITY

Client

LDA Design

LDA Design appointed Factory Furniture to create some truly eye-catching curved timber seating to go into Leys Square in Letcworth Garden City. Our design employed FSC® timber seat and backrest slats mounted onto a cast aluminium frame. The seats also had four cast aluminium armrests. Designing and manufacturing the sculpted frame was technically demanding. But we welcomed the chance to, once again, demonstrate Factory Furniture's commitment to fulfilling our design brief. The frame was cast in six parts which were welded together and

powder coated. Finally, the timber seat and backrest slats were added along with the armrests. The seats were installed at the Leys Square site with below ground fixings allowing the seat frame to seemingly 'grow' out of the paved stone surface.

## WARRIOR SQUARE GARDENS

For the Warrior Square Gardens project in Southend-On-Sea, Factory Furniture were asked to realise a design for a modular system made from a combination of glass bead peened and polished stainless steel, galvanised steel and FSC® timber. The stainless steel end panels of the seats had a Lime leaf and branch pattern etched into the surface, echoing the surrounding Lime trees in the park

Client

Gillespies

## APPLE INC., CALIFORNIA

Working with our distributor in the USA, M E O'Brien and Sons the client Apple Inc, California, engaged Factory Furniture to design and manufacture a pair of curved benches based on our standard Tree bench design. These bespoke wooden benches were then installed in an outdoor courtyard area in the Apple Inc. headquarters in Cupertino, California.

Client

Apple Inc.

## CHURCH STREET, BIRMINGHAM

Factory Furniture were asked to design and manufacture seating based on our Soca range and large planters for a development on Church Street in Birmingham. The benches and seats (with back and armrests) were designed to mount onto the top of Irish limestone plinths.

**Client**

Birmingham City Council

## CHIPPING BARNET

Metropolitan Workshop asked us to design and manufacture a large bespoke feature seat for a project in Chipping Barnet Church Gardens, London. Using a combination of a galvanised steel framework, FSC® timber slats and under-seat lighting, we succeeded in creating an eye-catching contemporary feature seat that enhanced its surroundings and was both original and unique. The seat was so large that it had to be created in four sections that could then be assembled when on site.

**Client**

Metropolitan Workshop

## TOURNAI, BELGIUM

Due to the sheer scale of the Tournai project in Belgium, taking the client's designs through to the manufacturing stage was a real challenge. The final product was comprised of differing lengths of picnic table with integral seating, each curved at different radii. Each section was broken down into more manageable modules which could then be bolted together. Accuracy and attention to detail were paramount at every stage..

Client

City Of Tournai

## COLMORE SQUARE, BIRMINGHAM

Factory Furniture were brought on board to provide the street furniture for a public realm enhancement project in the heart of Birmingham.

The design included a collection of large curved bespoke planters, some feature seating, litter bins, wall mounted seating and furniture for a chess garden 'pocket park'. The planters were designed around our popular Tree planter design and were manufactured in sections that could be bolted together on site.

**Client**

Colmore Business District

## HORNCHURCH

Factory Furniture were approached to realise the client's designs and take them through to manufacture. The technically demanding plans for this suite of concrete street furniture included benches, seats, bins and planters combining materials such as honed concrete, FSC® timber and powder-coated steel.

**Client**

Studioweave / London Borough  
Of Havering

## LE TRAMWAY, BESANÇON

Factory Furniture were approached by the project architects to design and manufacture around 130 benches based on our popular Skop range. The standard Skop bench design was modified to include special armrests that also acted as skate and rough sleeping deterrents. The powder-coated stainless steel benches were installed along the entire route of the new tramway running through the city of Besançon in France.

**Client**

Reichen Et Robert &  
Associates - Urban Architects

## GUY'S & ST THOMAS', LONDON

Collaborating with Verde Garden Design we devised and manufactured planters and seating for a courtyard garden in the hospital. The complex scheme included two large circular planters with diameters of around six metres which had integrated perimeter seating. The planters were manufactured in sections that could then be easily assembled on site. There were also a number of standalone curved benches (with and without backs) some of which had integrated lighting.

Client

Guy's & St Thomas' Charity

## CITY OF BATH

Working with Bath City Council to realise some concept designs for a range of new street furniture in bronze and FSC® hardwood we adopted an intricate patination process to achieve the darker tone on the cast bronze. The new street furniture includes removable cast bronze cycle stands as well as bollards is currently on 'roll out' in locations around the city.

**Client**

Bath City Council

## TWICKENHAM

The Tree seat has been used in several locations in and around the Richmond Borough and we were asked to design a solution for the high street as well as a few key areas using this design. We supplied straight seating with arms and backs as well as curved seats - all with our unique stainless steel frame making it ideal for town centre use where daily abrasion can present a problem in the long term.

**Client**

London Borough Of Twickenham

## HIGH STREET, BROMLEY

Factory Furniture supplied Flo benches as part of the regeneration development of Bromley town centre. As an extension of the scheme, the company was commissioned by Studio Egret West to supply larger curved versions of the seats as a feature seat for the large public space.

Client

Studio Egret West

## STOCKTON

Working with Studio Weave, we developed and produced one of the most complicated foundry operations we have used to date. The legs had an almost Escher quality which called for complex moulds and careful casting processes. The geometric design of the seat tops in FSC® Cumaru complimented the aesthetic and enabled the seats and benches to be used in varying configurations.

Client

Stockton Borough Council

## CAMBOURNE

We were asked if it was possible to create some large 2 x 2 x 1.3m planters to be clad in granite which could be moved, if required, even when fully planted. This meant designing a structure which would stay rigid when moved, whilst loaded with a gross weight of more than 5 tonnes. Working with our structural engineers we designed a planter very similar to our standard tree planter with a stainless steel rim which complimented the Cornish granite surround and with the aid of a forklift could be repositioned as required if access was need for street services.

**Client**

Clifton Emery Design

## STOCKLEY PARK

Factory Furniture were approached by ESA Architecture to realise and manufacture their designs for a set of four eye-catching benches. The benches were installed in the entrance plaza of the newly re-developed Bower building on the prestigious Stockley Park business estate, Uxbridge. Each 6m long bench featured stout FSC® timber seat slats supported on a galvanised steel sub-frame. The sub-frame was concealed behind a paved stone cladding surround. Each bench was lit along its longest sides with concealed LED strip lighting.

Client

ESA Architecture

## FINSBURY CIRCUS

Factory Furniture were appointed by Wilkinson Eyre Architects to design and manufacture several large planters and seating. The planters were destined for the 8th floor terrace of the newly redeveloped office building (formerly Riverplate House) in Finsbury Circus, London.

Each planter featured a strong galvanised mild steel frame. The frames were then clad in FSC® timber panels. Each planter also had hidden LED lighting providing dramatic night-time

illumination. The planters were designed in such a way that a sizable portion of the frame was submerged below finished floor level to allow for the podium build up

**Client**

WilkinsonEyre Architects

## DAWN TO DUSK, NINE ELMS

Studio Tord Boontje approached us to look at a design for the Thames Path in London, a spot where the artist Turner would regularly come to paint. The design enables the user to choose which direction they would prefer to view; to have privacy or be part of a group. The scheme includes three rotating benches and two clusters of three rotating chairs. Made from corten and FSC® Cumaru wood, the rotating seats incorporate drought resistant planting.

**Client**

Studio Tord Boontje  
Wandsworth Borough council

## CAMBRIDGE RAIL STATION

Supplied to the new Cambridge North station this bespoke version of our Soca seat in FSC® certified Cumaru and concrete. Providing plaza seating to the front of the station as well as a hostile vehicle mitigation deterrent to the station.
