ENDURING MATTE *by* FORMICA GROUP

INFINITELY GOOD LOOKING

Formica Infiniti™

ENDURING MATTE by FORMICA GROUP

INFINITELY GOOD LOOKING

Formica Infiniti™

is a surfacing material like no other. Elegant and sleek with a contemporary matte finish, it feels softer and works harder than anything we've made before. It's created using a technology that protects it from marks, finger prints and accidental abrasions so it stays looking better for longer.

What's more, it can be post-formed to hold a curve... It's one surface with endless possibilities.

FEEL GOOD FEATURES

MATTE, NO MATTER WHAT

Our innovative, patent-pending technology has micro-contours on the material surface that diffuse light. This creates a luxurious matte finish, which can add warmth and elegance to any environment.

SOFT TOUCH, SOLID PERFORMANCE

Formica Infiniti™ has a moleskin-like texture that's soft and silky smooth to the touch, but has all the durability of a solid surface. It's a feeling of quality that stands the test of time.

IRRESISTIBLY RESISTANT

Because we've made **Formica Infiniti™** such a pleasure to touch, it made sense to include anti-fingerprint technology to make it more resistant to marking. It's the surface that looks good, feels good, and stays that way.

REMARKABLY UNMARKABLE

Formica Infiniti™ has looks that will make a mark on you, but thanks to our technology it's pretty hard to make a mark on it. Its unique surface technology protects it from abrasions, so perfect for horizontal applications in high-traffic areas.

PERFECTLY POST-FORMABLE

We've created a surface that's the first of its kind, and kind of brilliant. An anti-marking super matte finish that can be post-formed to hold a curve to create beautiful streamlined interiors. It's easy to work with, and because it's been created with our ground-breaking technology, it always keeps its integrity.

UNLIMITED POSSIBILITIES

Formica Infiniti™ is a surfacing solution with exciting possibilities:

- It's perfect for both horizontal and vertical applications.
- Its post-formability allows for the creation of beautiful curves.
- Its antimicrobial properties makes it highly hygienic.
- If abrasions occur it can be thermally heated back to normal.
- It can do all this in a range of **20 decors** in **3 grades**: standard High Pressure Laminate, through-colour laminate and solid laminate.

The only limit is your imagination.

SMART TECHNOLOGY

Our **Formica Group Innovations Team** has been developing and perfecting our patent-pending curing process and next generation resin systems. Thanks to their efforts, it has helped us create our most advanced surface to date; a highly engineered matte surface.

This perfectly balanced fusion of process and resin systems has enabled us to create micro-contours that diffuse light, giving the surface an ultra-low gloss appearance. They also work to channel away moisture from the fingertips so they don't leave marks. The result is a surface that goes further than any other.

THE CLEVER BIT

INNOVATIVE CURING PROCESS

The higher performance, better aesthetics and multi-functional attributes of **Formica Infiniti™** are possible as a result of our new innovative patent-pending curing process.

STATE OF THE ART RESIN SYSTEM

Our next generation resin system works in combination with our curing process to create micro-contours on the surface of the material. The resin system gives the material enhanced durability and micro-scratch thermal healing capabilities, as well as preventing degradation caused by microbial growth.

MICRO-CONTOUR SURFACE

The micro-contours that are formed allow for the scattering and absorption of light waves within the surface topography that create the absolute matte look. They also channel away moisture from fingertips and create a larger surface area for moisture to evaporate.

How micro-contours work:

- Moisture is channelled away until evaporation
- Light rays are defused
