

## MILLSTONE FOUNTAIN KITS

Millstone fountain kits provide attractive, relatively inexpensive, features which are easy to maintain.

Self contained the packages allow water to be introduced into an environment without the need to install space consuming water surfaces.

Three systems are supplied as complete packages. The GSA 2075 contains a millstone of 1m in diameter, The GSA 1575, 0.8m in diameter and the GSA 900, 0.6m in diameter. Please see attached data sheets for more information.

Millstones have the appearance of dark sandstone with a textured surface. Fountains produce a low foaming cascade. Pumps installed are submersible with a large strainer surface preventing damage caused by particles entering the pump.

### Product characteristics at a glance

- ◆ Attractive, relatively inexpensive features that are easy to install.
- ◆ Can be used in external or internal locations.
- ◆ Self contained packages allow water to be introduced into an environment without the need for expensive, space consuming pools or external filtration systems.
- ◆ Low power and water consumption.
- ◆ Installation, lighting and electronic safety / timer controls are available as options.
