

ZENITH® & ZENITH HORIZON SEATS, BENCHES & TABLES

Steel framed timber-topped tables

Zenith and Zenith Horizon tables are characterised by their steel frames and inset timber tops, providing a robust construction at the same time as comfort for the users. The two styles have subtle differences designed to complement the seating from the corresponding ranges. Available in two standard lengths, to suit either 6 or 8 sitters. Their durable construction makes Zenith and Zenith Horizon tables a popular choice for a wide range of sites, from outdoor dining areas in schools and education campuses, to seafronts and picnic areas. Other lengths are available on request, including shorter versions which can serve as fixed games tables in a public realm situation. The inset posts on all versions make the table accessible to wheelchair users from both ends. Although generally supplied as an independent item, the table can be joined (either above or below ground) to benches or seats via low level plates to form a single-piece picnic-style table set, which can be bolted down or used as a freestanding unit.
