

LINX 300 RANGE

Circular rail version of the original Linx guardrail system

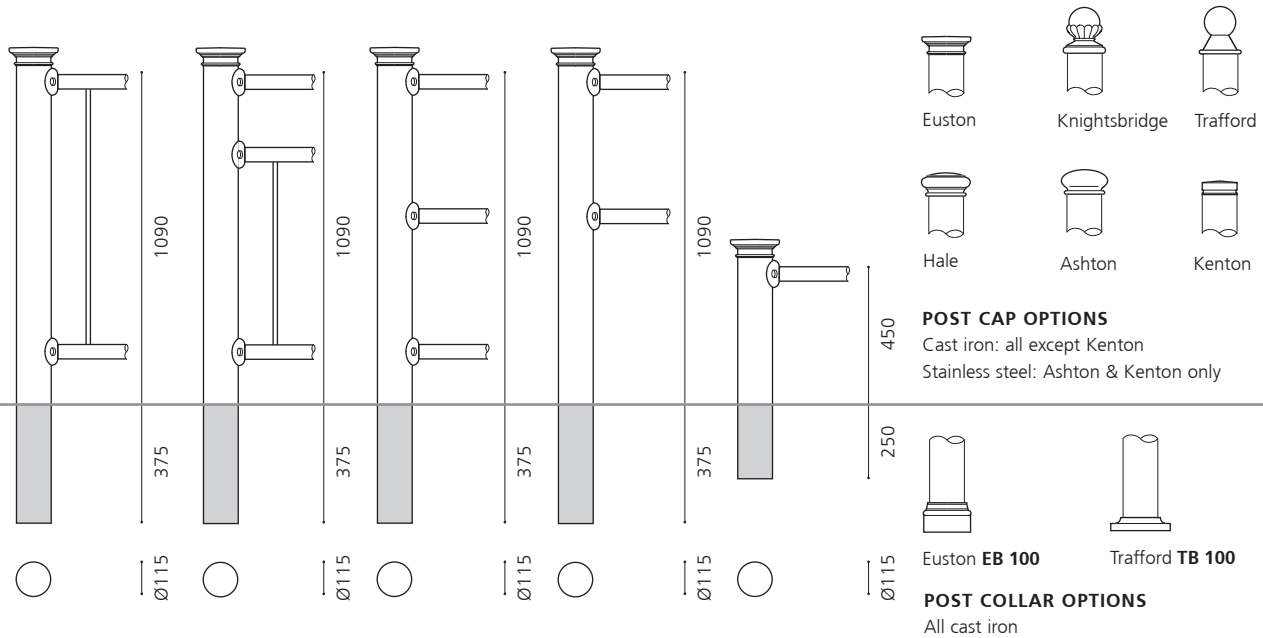

The Linx 300 system is a variation on the 100 and 200 systems, introducing circular section rails and a visually softer overall appearance as a result. The patented bracket connection between the post and rail is a heavy duty cast ductile iron boss fitted to the post via machine screws fixings into threaded inserts. Connection points on one side of the post are pre-fixed; those on the other side are fitted during site installation at the level and rotation to suit the alignment of the guardrail run. As shown on the main photograph below, the flexibility of the design means that standard posts and straight panels can be used even on sloping ground and curved alignments. The need for accurate pre-construction site surveys (or detailed levels design for new developments) and made-to-measure components are therefore avoided, reducing the chances of errors in site measurement or manufacture and also offering cost savings. Standardisation means that spares can be held in stock for immediate replacement in the event of any damage. Posts are offered in a choice of 6 decorative caps common to the Linx 100 and 200 systems, with 2 optional base collars for covering over the (often unsightly) area around the foot of the post.

Linx 300 post-to-rail connection

LINX 300 RANGE

POST CAP OPTIONS

Cast iron: all except Kenton
Stainless steel: Ashton & Kenton only

POST COLLAR OPTIONS

All cast iron

LINX 300 RAILING POSTS

Mild steel post and rail connectors, hot dipped galvanised finish, with choice of cast iron cap options

Intermediate / corner post for guardrail type	Euston Cap (cast iron)	Knightsbridge Cap (cast iron)	Trafford Cap (cast iron)	Hale Cap (cast iron)	Ashton Cap (cast iron)
FULL HEIGHT	LEP 300 F	LKP 300 F	LTP 300 F	LHP 300 F	LAP 300 F
3/4 HEIGHT	LEP 300 Q	LKP 300 Q	LTP 300 Q	LHP 300 Q	LAP 300 Q
3-RAIL	LEP 300 R3	LKP 300 R3	LTP 300 R3	LHP 300 R3	LAP 300 R3
2-RAIL	LEP 300 R2	LKP 300 R2	LTP 300 R2	LHP 300 R2	LAP 300 R2
KNEE-RAIL	LEK 300	LKK 300	LTK 300	LHK 300	LAK 300

OPTIONS:

- End post
- Base collar
- Stainless steel caps (Ashton & Kenton only)
- Painted finish
- Polyester powder coated finish steelwork (with painted cast iron cap & collar)

LINX 300 PANELS / RAILS

Mild steel panel / rails and rail connectors for 2m post c/s, hot dipped galvanised finish

LFR 300

Full height guardrail panel

LQR 300

3/4 height guardrail panel & single rail

L3R 300

3-rail

L2R 300

2-rail

L1R 300

Single rail

OPTIONS:

- Painted finish
- Polyester powder coated finish
- Gates - up to 4m, single or double leaf
