"To compete with the best as a hotelier, having shower toilets is absolutely essential."

Ernst Rieser, Owner, Hotel Rieser Aktiv & Spa Resort

## Wellness begins in the bathroom.

Pamper your guests with a new dimension in cleanliness. With Geberit AquaClean shower toilets, you can create the perfect atmosphere for wellness and therefore exceeding your guests' expectations and requirements in terms of comfort and hygiene. Complete satisfaction in the privacy of their own hotel room. Cleaning with water is not only gentle and thorough, it also provides a unique feeling of freshness – the whole day long.

“Shower toilets are a factor that can really influence hotel choice. This is because guests from around the world are placing greater emphasis on personal hygiene – appreciating that fresh feeling of cleaning with water.”

Thomas Bechtold, Deputy General Manager, Grand Resort Bad Ragaz

#### Focusing on customer satisfaction

In the Far East, cleaning yourself with water has long been a matter of course. In Europe, more and more people are now being won over by shower toilets. This trend is having a direct influence on guests' expectations of their hotel bathroom. With the extra comfort from Geberit AquaClean, you can meet these increasing requirements and stand out from your competitors.

"Shower toilets are contemporary and are a logical investment. You also save space in the bathroom."

Anja Bantle, Director, Steigenberger Drei Mohren

## A perfect solution. For more space.

Geberit shower toilets not only enable you to invest in guest comfort, they also stand out due to a host of other benefits.

### Optimum room design

In a small bathroom, Geberit AquaClean is an elegant way of providing extra wellness comfort and allow for a spacious bathroom design reducing the need for a separate bidet.

### Suitable for any bathroom

Thanks to its timeless, ultra-discreet design, Geberit AquaClean shower toilets can be easily incorporated into virtually any existing or newly designed bathroom environment.

### A cost-effective solution

Simple cleaning and low energy consumption will help you keep your overheads down.

# Product overview.

## The right model to fit any requirement.

Geberit AquaClean shower toilets offer clear benefits that are of special value for the hotel industry:

- Simple, hygienic cleaning
- Intuitive, self-explanatory operation
- Reliable technology and high-quality materials ensure a long service life
- Connections for water and electricity can be integrated, making them invisible
- Low energy and water consumption
- Easy to maintain
- Complies with all relevant European regulations and standards

- How it works:**
- 1 A pleasant water spray set at the desired intensity washes the user clean.
  - 2 The shower nozzle is rinsed with clean water both before and after use.
  - 3 The shower function can be switched on using the easy-to-operate control panel at the side.
  - 4 Alternatively, the remote control can be used to start and adjust the shower function.

## Geberit AquaClean Sela

### A new dimension in cleanliness.

Geberit AquaClean Sela was created by designer and architect Matteo Thun and fits virtually any bathroom concept thanks to its attractive design. It cleans using a gentle and airy water spray at body temperature. The intensity can be adjusted to one of five levels, while an oscillating spray guarantees a particularly beneficial clean. The toilet seat can also be removed for ease of cleaning. The intelligent technology behind the shower function and all electricity and water connections are integrated into the ceramic unit, making them invisible. Geberit AquaClean Sela is available in both floor-standing and wall-hung versions.

- Individually adjustable spray arm position
- Remote control
- Oscillating spray (spray arm moves forwards and backwards)
- Energy-saving mode
- User detection
- Soft-closing and soft-stop opening functions

## Geberit AquaClean 8000plus

### The luxurious pampering experience.

Alongside the shower function, the Geberit AquaClean 8000plus offers many additional pampering functions: the temperature and intensity of the water spray can be individually adjusted. The massage function has an invigorating effect and the integrated warm-air dryer dries you off pleasantly after cleaning. As soon as you sit on the shower toilet, the automatic odour extraction function switches on, ensuring a welcome feeling of freshness in the room.

- Individually adjustable spray arm position
- Warm-air dryer with adjustable temperature
- Adjustable water spray temperature
- Odour extraction
- Oscillating spray (spray arm moves forwards and backwards)
- Soft-closing and soft-stop opening function
- Massage spray
- Remote control
- Lady wash
- Energy-saving mode
- User detection

# Always a perfect fit.

## Solutions for any situation.

Geberit shower toilets offer a great deal of scope for bathroom layout, thanks not only to the design of the products themselves but also to their connection technology. Geberit AquaClean complete solutions fit all Geberit installation and flushing systems. In renovated bathrooms, Geberit AquaClean can also be combined with the Geberit Monolith or with the Geberit AquaClean Design Panel.

↑ More freshness with every flush thanks to Geberit DuoFresh: an active carbon filter, integrated elegantly into the flush plate, plus a practical insert for in-cistern blocks.

↑ The innovative, touch-free Geberit Sigma80 flush plate can be operated easily and hygienically. A simple push of the hand is enough to activate the dual flush.

The new WC elements from Geberit are tailored to match the dimensions of the Geberit AquaClean products, ensuring that all connections fit perfectly. In combination with Geberit Duo Fresh, odours are extracted inside the ceramic pan itself.

The Geberit Monolith sanitary module for the WC is an attractive alternative to exposed or concealed cisterns. All the necessary installation technology including water inlets and outlets and the cistern itself are hidden beneath an elegant glass housing in white, black or umber. Matching Geberit Monolith sanitary modules for the wash-basin allow a coherent bathroom design to be created all from a single source.

The Geberit AquaClean Design Panel allows the connections for a shower toilet to be laid cleanly and elegantly without effecting the existing tilework. The slimline panel is fixed to the flat tile surface and can be removed at any time without leaving any traces.

"Globalisation has meant that there is no longer such a thing as 'national standards' in the hotel industry – the expectations of luxury and comfort are now identical across the world."

Ray Iunius, Head of Business Development & Marketing, Ecole hôtelière de Lausanne

↑ Grand Resort Bad Ragaz, Bad Ragaz

**Shower toilets, the new essential**  
Some of the world's best-known and most popular hotels are already looking to Geberit AquaClean to meet their guests' higher and ever-increasing expectations when it comes to comfort and increased hygiene. Such names include the Dorchester and the Corinthia in London, Coworth Park in Ascot, the Buddha Bar Hotel in Prague, the Victoria-Jungfrau Grand Hotel in Interlaken, the Grand Resort Bad Ragaz, the Hilton Hotel and the Trois Rois Grand Hotel in Basel. When will your hotel join this growing list?

# Sustainable products. For sustainable construction.

Geberit regularly scores top marks when it comes to sustainability, proving the importance that the company attaches to environmentally friendly production and products alike. During their development, all of its products are subject to ongoing optimisation in terms of environmental compatibility, the efficient use of resources and durability – throughout the entire life-cycle.

Complete shower toilet solutions made by Geberit have a positive environmental footprint and are comparable with conventional WCs and the use of toilet paper. Compared to the amount of paper consumed with a standard WC, the additional water consumption in the case of a shower toilet is immaterial. The manufacturing process for the toilet paper and the electricity required to heat the water, are highly significant. Additional energy savings can be realised through individual settings on Geberit AquaClean products, reducing environmental pollution even further.

Geberit AquaClean Sela and 8000plus compared to a conventional WC plus toilet paper and a bidet.

# Your benefits. At a glance.

The high-quality shower toilets made by Geberit combine innovative technology and long-lasting quality and attractive designs.

By installing Geberit AquaClean, you will:

- add an innovative product to your hotel design.
- meet your guests' increasing hygiene requirements.
- optimise the layout of your bathrooms.
- stand out from your competitors.
- make an investment that pays off in the long-term.

## Perfect service

Comprehensive guarantees, support and servicing mean that the operation and maintenance of our shower toilets are guaranteed at all times:

- Technical advice and support at all levels.
- Comprehensive information and multilingual operating instructions for your guests.
- Wide range of training available for cleaners, building services and staff.
- Servicing packages tailored to your requirements.

## BREEAM credits

As the leading and most widely used environmental assessment method for building, BREEAM (BRE Environmental Assessment Method) has fast become the measure of sustainability within the hotel world, giving designers and hoteliers alike the competitive edge within their field.

BREEAM looks at every aspect of a hotel building against a set of sustainable criteria and provides an overall score from Pass through to Outstanding. A key part of the assessment is water usage. Therefore, installing a Geberit AquaClean in conjunction with a Geberit low litre flushing concealed cistern will provide you with one of the quickest and easiest ways to achieve BREEAM second level credits. This coupled with the overall positive environmental impact of Geberit products means, your hotel will score highly for sustainability.

For further information about BREEAM points go to [www.breeam.org](http://www.breeam.org)
