

**ALTHON GRC GP LARGE HEADWALL**

Althon GRC GP Large Specification Information

A one piece glass reinforced headwall with an opening to suit 150mm diameter pipes and knockout webs to enlarge to 225mm and 300mm diameter pipes.

Althon GRC GP Large Headwall Installation

Dig out sufficiently to allow headwall flanges to finish flush with the batter. Take outfall pipe (minimum length 1.5m rigid impervious pipe) and slide it through headwall so it protrudes approximately 50mm. Make a good connection with the land drain and seal by returning approximately 150mm of soil into trench and consolidating. Unravel the string and draw the anchor back along the trench as the rest of the backfilling is completed.

Material: Glass Reinforced concrete  
 Weight approximately 30kg  
 All dimensions in mm
