

ALTHON GRC GP SMALL HEADWALL

Althon GRC GP Small Specification Information

A one piece glass reinforced headwall with an opening to suit 80mm diameter pipes and knockout webs to enlarge to 100mm and 150mm diameter pipes.

Althon GRC GP Small Headwall Installation

Dig out sufficiently to allow headwall flanges to finish flush with the batter. Take outfall pipe (minimum length 1.5m rigid impervious pipe) and slide it through headwall so it protrudes approximately 50mm. Make a good connection with the land drain and seal by returning approximately 150mm of soil into trench and consolidating. Unravel the string and draw the anchor back along the trench as the rest of the backfilling is completed.

Material: Glass Reinforced concrete

Weight approximately 11.5kg

All dimensions in mm
