Jacksons
Guaranteed Quality since 1947

Linebacker PNR features the PAS 68 (Jacksons Linebacker has been successfully impact tested in accordance with BSi PAS 68:2010, PAS 68 rating of PAS 68:2010 V/7500(N3)/80/90:7.3/21.4) certified and Secured by Design preferred Linebacker crash fence system, concealed within a traditional timber post and rail fence design. Linebacker PNR is shallow mounted and only requires a 500 mm foundation. The result is a hostile vehicle mitigation barrier capable of arresting a 7.5 tonne vehicle travelling at 50mph (80km /h) and equally capable of blending into its surrounding environment.

The proven Linebacker cable crash fence is accommodated within treated timber rails (treated to use Class 3) which are fixed onto timber posts, treated to use Class 4.

Linebacker PNR is ideally suited to sites which require both PAS 68 certified perimeter protection performance and a visually attractive fence that does not draw attention to the high security nature of the site.

Features

- Outward appearance of a traditional timber post and rail fencing system
- Linebacker PAS 68 single unbroken cable lengths
- Galvanized steel cables
- Cables do not require re-tensioning on site
- Foundation 500mm
- V/7500(N3)/80/90:7.3/21.4
