

CRASH RATED SHALLOW MOUNT ROAD BLOCKER

The Crash Rated Shallow Mount Road Blocker has been designed to prevent the threat of potential terrorist attacks where high security is required.

Crash tested at MIRA (Motor Industry Research Association) the test was a great success, passing 100% with '0' penetration and still operational after use. It is driven via a hydraulic 7.5Kw power pack with inverter/plc controls which requires a three phase supply.

- High grade PFC and RHS
- Aluminium Curtain, 3mm skirt
- Panels in 5 sections
- Easy Removal after Impact
- 3 phase supply 415 VAC
- PLC & inverter controlled
- Performance Classification: V/7500{N3}/80/90:0/24.6

WIDTH (MM)
2000 - 4000

TEST RESULTS	DUTY CYCLE	FINISHES
PAS 68 / K12 - 50mph / 80kph	100%	<ul style="list-style-type: none"> • Galvanised bottom frame • Top section powder coated • Also an anti-skid paint finish is applied to the top plate
