

Tiered Planters

Choose your base, choose your tier! Create your own statement with your own fountain of colour from one of the following standard selections, or one can be made to your own specification.

Top Tips

For safe assembly, installation and planting of Floor Standing and Tiered Planters

1. Be careful! Floor Standing and Tiered Planters are heavy. They are designed to be moved with a pallet trolley, fork-lift truck or other mechanical lifting device. They can be manoeuvred by hand when empty, but do so with two people or more.
2. When used with Tiers, they must be assembled where the unit is to be located. The unit must be placed on solid, stable ground.
3. Tiered Planters are quick and easy to assemble, following our manufacturer's instructions. Once assembly is complete, fill each tier with moist compost, and slow release fertiliser if desired, and plant up densely for best results.
4. The integral water reservoir(s) can now be filled with water and nutrient. Leave the unique **Aquafeed™ Self-watering** capillary action wicks and dispersal matting to do the rest!
5. Make one final check to ensure that the unit is stable.
6. Top up with water and nutrient no more than twice a week.

Floral Fountain Planter

With the Big Flower Pot floor standing planter providing a solid, sturdy base, this centrally situated two tier unit is simple and straightforward to assemble.

Product Code	Base Diameter mm	Height mm	Number of central plant-up tiers
FF-2P	800	1700	2
